All bonds are for \$1,000 each, and interest is payable at Farmers Loan & Trust Company, New York.

Capital stock—The capital stock is \$20,000,000, of which \$17,000,000 is common stock and \$3,000,000 is 7 per cent cumulative preferred stock on which interest is payable quarterly. All dividends on preferred to and including Oct. 1, 1896 (1 1/4 per cent), have been paid.

For the preferred stock it is provided that if in any year dividends amounting to 7 per cent are not paid on said stock, the deficiency shall be a charge upon the net earnings of the company, and shall be paid subsequently before any dividend shall be paid upon or set apart for the common stock. In case of liquidation or dissolution of the company the holders of the preferred stock shall have prior right on the assets of the company before any amounts shall be payable to the holders of the common stock.

On May 1, 1896, there had been issued and sold \$1,135,200 of the preferred stock and \$15,010,000 of the common stock, and there remained as a balance in the company's treasury \$1,864,800 of 7 per cent cumulative preferred stock and \$1,990,000 of the common stock to be issued. See full description of property in application to the New York Stock Exchange in June, 1895.—V. 60, p. 1148.

Bonds.—The Minneapolis Street Railway Co. jointly and severally with the Minneapolis Lyndale & Minnetonka Railway Co. has issued \$5,000,000 5 per cent 30-year first mortgage and first consolidated mortgage gold bonds, of which \$940,000 are held in trust by the Farmers' Loan & Trust Company to redeem the \$940,000 prior lien bonds. See statement to N. Y. Stock Exchange in June, 1895.—V. 60, p. 1149.

The St. Paul City Railway Company has issued \$4,298,000 5 per cent 50-year cable consolidated bonds (including \$680,000 held by the Farmers' Loan & Trust Company, trustee, to redeem the \$680,000 prior lien bonds above) under a mortgage limited to \$5,500,000. Under the mortgage these bonds can only be issued against the actual cash cost of construction, under a mileage limit of \$15,000 per mile. Part of these consols (\$1,138,000 on June 11, 1895), are guaranteed, principal and interest, by endorsement of Twin City R. T. Co. See statement to N. Y. Stock Exchange in June, 1895.—V. 60, p. 1150.

The certificates of indebtedness (notes) were issued to the Twin City Company by the Minneapolis Street Railway and St. Paul City Railway, and having been guaranteed by it were issued. Original issue by each company, \$1,000,000; outstanding, \$750,000 each, or \$1,500,000 in all, of which \$270,000 held by the Twin City Company.

ROAD—The entire system now consists of 225 miles of standard-gauge road, of which 219 miles is electric and 6 miles cable, all of which has been recently built or rebuilt, and thoroughly equipped. A double-track electric line, 9 miles long, connects the business centres of the two cities.

GENERAL FINANCES—Early in 1895 the Twin City Company created an issue of \$3,000,000 preferred stock (see capital stock above), with the proceeds of which it has liquidated all its floating debt, including mortgage notes, except \$1,500,000 of the 6 per cent certificates not yet due, and of this amount the company has anticipated by purchase \$270,000, which it holds in the treasury. On Aug. 1, 1896, there was yet available the proceeds of the balance of the 7 per cent preferred stock (\$1,864,800), which will liquidate the entire balance of the 6 per cent certificates (\$1,500,000), leaving a balance of \$364,800 plus the \$270,000 now in the treasury of the company, or \$634,800 available cash in the company's treasury. The payment of the balance of the 6 per cent certificates will eliminate all indebtedness of the underlying companies except the \$10,298,000 of bonds. By this transaction the interest charges will be reduced to \$544,500 per annum.

METROPOLITAN TRACTION-

ORGANIZATION—Organized under laws of New York to construct and control railways in New York City. Its system, which covers the Broadway Cable line, traverses all parts of the city and embraced in May, 1896, 165-50 miles of lines, operated as follows: By cable (single track), 25-34 miles; by underground electricity, 6-78 miles; and by horses, 133-39 miles. Of this mileage, 49-83 miles, including the Broadway Railway and its extensions, are owned in fee by the Metropolitan Street Railway Co. (whose stock is all owned by the Traction Company) 24-12 miles are held under lease, with the additional security of two-thirds of the stock of the subordinate companies being owned by the Traction Company, and 91-60 miles are held under long leases, in no instance less than 99 years. V. 62, p. 278.

LIQUIDATION OF COMPANY—The directors on Nov. 17, 1896, it was reported, voted to wind up the company's affairs, to give the stock of the Metropolitan Street Ry. (\$30,000,000), which it holds in its treasury in exchange, shares for share, for its own outstanding stock, but in February, 1897, no final action had been taken.

METROPOLITAN TRACTION SYSTEM—METROPOLITAN STREET RAILWAY—

ORGANIZATION—Chartered in 1893, and became the operating company of the Metropolitan Traction System, it having absorbed or taken over the leases of all the other roads completed and in operation. In Nov., 1893, absorbed the Houston West St. & Pavonia Ferry, Broadway Surface and South Ferry roads. In May, 1894, consolidated with Metropolitan Crosstown and Lexington Avenue & Pavonia Ferry companies, and in November, 1895, with the Columbus & Ninth Avenue.

The Lexington Avenue & Pavonia Ferry line was started with cable in October, 1895, and the Columbus & Ninth Avenue line was partly opened in December, 1894, the cars of both running over Broadway direct to the Battery. The increase of traffic due to the opening of these new lines has been very large, exceeding all expectations. Leased the Eighth Avenue Railroad for 99 years from Jan. 1, 1896, at rental of \$215,000 per annum, payable quarterly, the lessee guaranteeing to spend \$1,000,000 within two years for improvements, change of motive power, etc.; betterments to revert to lessor at expiration of lease; lessee pays taxes.—V. 62, p. 40. Leased the City Line of the N. Y. & Harlem RR. Co. for 99 years from July 1, 1896, at a rental of \$350,000 for first five years and \$400,000 thereafter. The 34th Street line was opened Jan. 10, 1895. It is proposed to lease the Second Avenue line—see V. 64, p. 235.

In November, 1896, the Metropolitan Traction Co., which owned all the Street Ry. stock proposed to wind up its affairs, but in February 1897, no final action had been taken. See Metropolitan Traction above and also V. 63, p. 922. It is proposed to introduce the underground electric system on the Fourth, Sixth and Eighth Avenue lines early in 1897.—See V. 63, p. 1063; V. 64, p. 330.

Table with columns: STOCK & BONDS, Par., Interest, Outstanding, Maturity. Lists various bonds and mortgages with their terms and amounts.

Stock.—In July, 1896, the authorized capital stock was increased from \$16,500,000 to \$30,000,000. V. 63, p. 70.

Bonds.—Of the Broadway Surface first mortgage bonds, \$1,125,000 together with interest on all the \$1,000,000 second mortgage bonds, was also under lease the payment of the South Ferry \$350,000 bonds were assumed by the Broadway & Seventh Avenue RR. Co. The remaining \$225,000 Broadway Surface 1st 5s were assumed by the 23d Street Ry. Co. The Lexington Avenue & Pavonia Ferry 5s and Columbus & Ninth Avenue 5s were fully described in the CHRONICLE, V. 60, p. 1146. Both loans were guaranteed and on legal merger of the companies were assumed by the Metropolitan Street Railway Co.

Guaranty.—The company guarantees the consols 5s of the Broadway and Seventh Avenue.

METROPOLITAN TRACTION SYSTEM—BROADWAY & SEVENTH AVENUE—A horse and cable road.

ORGANIZATION—Chartered May 26, 1864. In June, 1885, acquired by agreement the right to use jointly the tracks of the Broadway Surface RR. Co. (now Metropolitan St. Ry. Co.) on Broadway between 15th Street and the Battery. Cable was started on Broadway between 59th Street and the Battery in 1893; remainder of road horse power. The Metropolitan Traction Co. owns a majority of the capital stock, and road is leased to the Metropolitan Street Ry. Co., as below stated.

Table with columns: STOCK & BONDS, Par., Interest, Outstanding, Last div., etc. Lists various bonds and mortgages.

Of the consols, mort. of 1893, for \$12,500,000, \$1,850,000 is reserved to retire at maturity the other bonds in the table. The outstanding consols paid for laying the Broadway cable. The consols are guaranteed, principal and interest, under the terms of the mortgage by the Metropolitan Street Railway Co., which now owns the Broadway line south of 15th Street. They cover the road owned in fee, also the right to use the tracks on Broadway from 15th Street to the Battery; they are also a direct lien on the entire cable and its accessories. Trustee, Guaranty Trust Co. of N. Y.

The Broadway & 7th Avenue assumed the Broadway Surface 1st mortgage bonds for \$1,125,000 and payment of interest on the second mortgage bonds for \$1,000,000, in part consideration for use of tracks between 15th Street and the ferry. Under lease of South Ferry road it also assumed that company's bonds for \$350,000.

NORTH SIDE TRACTION—

ORGANIZATION—Organized in 1896 by parties interested in the Second Avenue Traction and United Traction companies to lease the Federal Street & Pleasant Valley Ry. and Pittsburg Allegheny & Manchester Traction Co. In Jan., 1897, Second Ave. Traction stockholders voted to lease that road to North Side Traction for 999 years at a rental of 5 per cent on the money invested. V. 64, p. 235. The transfer of the F. S. & Pleasant Valley is a practical sale of the road, made, owing to the law under which the present charter was secured, in the nature of a lease for a term of 950 years on a guaranteed annual rental of 5 per cent, payable Jan. 15 and July 15, 1897, and each succeeding year, to the Pittsburg Trust Co. of Pittsburg. The lease provides that the present stockholders can change their stock for stock in the North Side Traction Co. or can retain their present stock with a guarantee of 5 per cent as a dividend. The North Side Traction will be controlled by the United Traction Co.—V. 63, p. 31, 76, 189, 794, 881, 1064; V. 64, p. 235.

PROVIDENCE-PAWTUCKET-PAWTUCKET VALLEY, R. I.—UNITED TRACTION & ELECTRIC.
 (See Map on page 73.)

ORGANIZATION—Controls by ownership of stock and bonds the entire street railway system of the city of Providence and of the towns of North Providence, East Providence, Cranston and Johnston, and all the street railways of the city of Pawtucket and towns of Lincoln and Cumberland, serving, it is said, a population of about 250,000. In addition to the above the United Traction & Electric Co. controls by ownership of stock and bonds the street railway system in the Pawtucket Valley located in the towns of Warwick, Coventry and Cranston, serving at present a population of nearly 20,000, and also an electric light plant serving to a considerable extent the same population. Proposed extensions of this system will further serve a population of some 5,000 and at the same time provide direct connection with the main lines operated in the city of Providence and suburban territory. The securities by which this ownership is held are deposited to secure the bonds below described. The United Traction & Electric Co. was chartered in New Jersey to build and equip railroads, sell bonds, mortgages, etc.

Bonds—Total issue limited to \$8,000,000, with provisions for increasing the issue by not over \$1,000,000 for actual cost of new track (including equipment) within 18 miles of the City Hall of Providence, R. I., and additional to 104 miles of track, but at a rate not exceeding \$12,000 per mile of such new track. Under this provision \$247,000 of bonds were issued in 1895 against new mileage. The bonds are secured by mortgage on all the mortgage bonds and all the stock of the Union Ry. Co. of Providence and all the stock of the Pawtucket Street Ry. Co.

The Providence Cable Tramway Co. is leased to the Union Railway Co. for 50 years for 6 per cent on its capital stock, all but two shares of which is owned by the Union Railway Co.

ROAD—The companies above mentioned were operating early in 1893, in the cities and towns designated about 82½ miles of track. During 1894 this road was equipped with electricity, and 21½ miles were built, making a total of 104 miles. In August, 1896, there were completed and in operation 129.7 miles, which include 7.3 miles of the Pawtucket Valley Electric Street Railway.

SECURITIES PLEDGED—These in February, 1896, included all of the \$2,000,000 capital stock of the *Union RR.* of Providence, all of the \$200,000 capital stock of the *Pawtucket street Ry.* (no bonds) and all of the \$3,000,000 first mortgage bonds of the *Union RR.* of Providence. The *Union RR.* owns \$299,800 of the \$300,000 capital stock of the *Providence Cable Tramway Co.* (no bonds).

TREASURY SECURITIES—The United Traction & Electric Co. has in its treasury \$361,800 of the \$400,000 capital stock and \$150,800 of the \$198,000 first mortgage bonds of the Pawtucket Valley Electric Ry.

All the above-described roads of the United Traction & Electric Co., including the Providence Cable Tramway, are now operated by electricity, and since completion of the electrical equipment in April, 1894, the large increase in the earnings anticipated has been fully realized.

RICHMOND TRACTION CO.—(See Map on page 74.)—An electric road.

ORGANIZATION—Incorporated August, 1895. Road opened for business June 19, 1896. About twelve miles of track now in operation and five miles additional under way, which will make a total of 17 miles. This company operates a double-track electric line the full length of Broad Street, one of the principal thoroughfares of the city of Richmond; also several branches radiating into different thickly populated sections of the city. In the equipment and construction of this railway the latest inventions and developments of electrical and mechanical science have been utilized throughout.

The tracks of the company within the city are laid with 95-lb. steel girder rails, on white oak cross-ties for a considerable portion of the distance, cubed in concrete, and along streets paved with granite blocks. The lines in the suburbs are laid with 60-lb. steel T rails.

The company owns its power house, brick and steel car house, etc. Its generators and motors are made by the General Electric Company of New York. The population of Richmond and its suburbs, including Manchester, is estimated at 115,000.

RICHMOND RAILWAY & ELECTRIC CO.—(See Map on page 75.) Operates an electric railroad and electric-lighting plant.

ORGANIZATION—The following description has been furnished the SUPPLEMENT by the fiscal agents of the company: "Organized in 1890 by consolidation of three street railway and three electric-lighting companies. The company occupies the principal streets of Richmond and Manchester, thus furnishing street railway facilities to over 100,000 people. The system embraces about 70 miles of track, including suburban roads, and by its system of transfers passengers are carried over all the city and branch lines for a single fare."

"The construction of the railway and the equipment is first-class in every respect, the power houses being ample for handling all the traffic of the two cities, present and prospective. This company supplies the entire electric lighting for the two cities, having exclusive contracts with both municipalities."

ROAD—Operated about 14 miles of track, of which about 5 miles steam and the remainder trolley. About two-thirds of the track is in the city—the rest is suburban.

ANNUAL REPORT—The annual report of President Johnston, presented to stockholders in January, 1895, showed that the earnings of the company for the last fiscal year were less than the average of the two previous years; in fact, that there had been a serious falling off in the earnings, and that the property had been operated at a loss. He attributed this to the bad times financially, and the rate war with the rival company, the Savannah Electric Railway Company.

This report was quoted fully in the SUPPLEMENT for May, 1895.

OFFICERS—President, James H. Johnston; Vice-President, Henry Parsons; Secretary, E. J. Thomas; Treasurer, E. F. Schmitt. Directors (elected February, 1896), J. H. Johnston, Henry Parsons, E. J. Thomas, J. N. Harriman, Luke Carson, C. S. Hardee, J. B. Squires.—V. 60, p. 748, 835, 873.

 ORGANIZATION—Incorporated in 1892 and acquired by purchase the old Toronto City Street railways and the exclusive privilege to work street railways in the city of Toronto for a term of 30 years from September 1, 1891 (with the exception of two small reservations in the act which are believed to be of no importance), a privilege which has since been ratified by act of the legislature of Ontario.
 In September, 1896, it was reported that the Toronto Ry., in connection with the Montreal St. Ry., had leased the Birmingham Tramways (4 1/2 miles of track operated by horses) for 21 years at an annual rental of \$5,000. Electricity is to be introduced.

Payments to the City—These consist of \$800 per mile of single track and \$1,600 per mile of double track per year; and a progressive percentage on the gross receipts of the company, viz.: 8 per cent of receipts till these reach \$1,000,000; 10 per cent of gross receipts between \$1,000,000 and \$1,500,000; 12 per cent between \$1,500,000 and \$2,000,000; 15 per cent between \$2,000,000 and \$3,000,000; 20 per cent on all gross receipts over \$3,000,000. On Sept. 1, 1921, city can purchase the property at a price to be settled by arbitration.

First mortgage of 1895 was authorized by Congress for the sole purpose of changing the motive power from horses to electricity. It covers all the company's rights, privileges and franchises, together with valuable real estate. This real estate has been appraised at \$700,000 and is said to be worth over \$1,000,000. A sinking fund from sale of unred real estate may purchase (not call) bonds at not over 110 and interest.

The collateral trust bonds are convertible into stock at option of holder at the rate of one share of stock (par \$50) for \$100 of bonds; they are secured by deposit of 5,000 shares of the company's stock.

The debt certificates were issued in Sept., 1896, for equipment.

Stock—The stockholders, besides being liable for the remaining \$20 per share, are liable under the provisions of the charter for an amount equal to their share holdings. In addition to the stock given above in table as outstanding, 5,000 shares are held by trustees as security for the collateral trust bonds.

ABBREVIATIONS, ETC.

The terms and abbreviations employed in this SUPPLEMENT are explained in the following :

"STOCK & BONDS"—Under these words are shown—

"STOCK"—The amount of stock authorized immediately follows the word "stock," and against this is the par value of single shares, viz., "Stock, \$200,000—\$100," means stock, total issue authorized by charter or by act of legislature, \$200,000, divided into shares of \$100 each; "f. p." following the amount given as outstanding means "full paid."

"Pref." means "preferred stock." "Pref. 6 p. c. cum." means preferred stock entitled to dividends of 6 per cent per annum, such dividends if not paid accumulating, all dividends due and unpaid to be paid in full for each and every year before the common stock receives anything. "Pref. 6 p. c. non-cum." means simply that the stock is entitled to 6 per cent per annum if earned, but that if unearned in any year the dividend for that year will not be paid subsequently.

"BONDS"—"Mort." or "M." means mortgage. "Consol." or "con. M." means consolidated mortgage. "Gen. M." means general mortgage. The amount next following is the total authorized amount that can be issued under the mortgage. The word "gold" is usually spelled out, but in some instances is contracted to "g." while "cur." means currency.

"Conv." means convertible into stock. "S. f." means sinking fund. "c." means coupon; "c." means coupon but may be registered as to principal; and "c. ar." means that registered certificates without coupons as well as coupon bonds are outstanding. The letters "p. m." mean per mile, so \$15,000 p. m. means that the issue of bonds is restricted to \$15,000 for each mile of track. "Gnar." means guaranteed, and "guar. p. & l. (end)." means guaranteed as to principal and interest, the guaranty being endorsed on each bond.

"DATE"—The date of issue on the face of the bonds is indicated under the word "date."

"INTEREST"—Under this heading is given the rate per cent yearly of the interest payable on the bonds or (if guaranteed) of the dividend payable on the stock; also the months when the interest or dividend is payable, thus, "6 J - J" means 6 per cent per annum payable January and July; correspondingly, "F - A" is used to mean February and August; "M - S" means March and September, and so on, while "Q - J" means quarterly beginning in January and "Q - F" quarterly beginning in February. [The day when the interest payment is due can generally be determined by noticing when the loans mature, the day of the month there given being in most cases the same as for one of the interest dates.]

"ROAD"—The word "track" means in Street Railway parlance all track, whether main line, siding, switch or second track. "Rails are 80-lb. girder" means that each rail weighs 80 pounds to the yard.

INDEX TO RAILWAYS.

ELECTRIC STREET RAILWAYS AND ABUTTING PROPERTY OWNERS.

Last December (CHRONICLE of December 5 1896, pages 990 and 991,) we referred to the decision of the Supreme Court of Massachusetts in a case involving the question whether the construction in the streets of a city of an electric street railway, to be operated by the overhead system of trolleys, imposed a new burden or servitude on the land for which compensation must be made to the abutting property holders. The decision in that case was adverse to such a contention, the Court holding that so long as the companies are authorized to use the streets only in common with other travelers, and their structures do not prevent other travelers from using them in the ordinary way, and do not furnish any greater obstruction to light and air than appeared from the evidence in that case, such use does not constitute a new taking of land or easements in land for which compensation must be made.

Recently the Supreme Court of Connecticut also rendered a decision involving the question of additional servitude. The decision is to the same effect as that of the Massachusetts Court. The question of course is one of great importance, and therefore the matter possesses wide interest. As it happens, the ruling in the Connecticut case is not that of a unanimous Court, three of the judges (Baldwin, Fenner and Torrance) taking the view that electric street railways on public highways do not impose a new burden on the land, and the other two judges

(Andrews and Hamersley) taking the opposite view. The case was that of the Canastota Knife Co. vs. the Newington Tramway Co. The plaintiff had made application as the owner of a fee in certain land within the limits of a highway in Newington for an injunction against the construction of an electric street railway thereon. The tramway company filed a demurrer to the complaint in the Superior Court for Hartford County, which demurrer was sustained *pro forma* and a judgment rendered dismissing the complaint. From this an appeal was taken to the Supreme Court of the State. The five judges of that Court were unanimous in the judgment that the lower court had erred, but the finding of error by the minority judges was for different reasons than that of the majority.

The injunction had been claimed on two grounds: First, that the charter of the Newington Tramway Company imposed a new burden on the plaintiff's soil, and secondly that the company in attempting to lay its tracks on the highway in front of the plaintiff's premises was undertaking to build a road under a location which diverged substantially from any of the routes authorized in its charter. The minority judges upheld the first contention, saying that the construction of the proposed road would "constitute a trespass and a continuing trespass on the plaintiff's land, and such a trespass may be restrained by injunction", and that for this reason the demurrer to the complaint was insufficient. On the other hand the majority judges hold that the charter of the Tramway Company is not one which contemplates and requires the construction of a railway in such a manner as substantially to obstruct ordinary highway travel or necessarily to cause special damage to any landowner; hence that there was no error in sustaining the demurrer as far as this ground of relief was concerned; but they support the complainant in his second contention, namely that the route proposed diverges from the routes authorized in the charter, and hence that the demurrer should have been overruled on the ground that the Tramway Company had no franchise justifying its invasion of the plaintiff's freehold.

The reasoning of the majority, in denying the claim that the construction of an electric road imposes a new servitude in land, is clear and strong, and of course it is this part of the decision which is of inter-

est to our readers. The opinion was by Judge Baldwin, who said that it is the prevailing doctrine in the United States and was settled, as respects Connecticut, in the case of *Imlay vs. Union Branch Railway Co.* (26 Conn., 249,) that the location of an ordinary steam railroad upon a highway imposes an additional burden upon the soil for which the owner of the fee is entitled to demand compensation. The *Imlay* case was put upon the ground that no substantial, practical, or even technical, identity exists between the use of land for a highway and for a steam railroad. The essence of that decision was that the grant of a railway franchise by the Legislature authorizing the occupation of land subject to a highway in such a manner as substantially to interfere with the proper uses of a highway, or substantially to change them by introducing another not practically identical with the original ones, was the bestowal of a power the exercise of which charged the land with a new servitude.

A street railway such as that authorized by the charter of the defendants in this case, declares the Court, differs in certain essential characteristics from the ordinary railway running from one State or town to another, part of which may chance to be located on a highway. Its tracks conform to the established grade of the highway. It has no exclusive privilege as to their use. Its mode of using the street does not necessarily or naturally render that part of it which it occupies, whether by its tracks or its poles and wires, impassable or seriously inconvenient for ordinary travel. Such a street railroad may be, and up to the present time such roads have usually been, so constructed and so used and operated, as to be distinguished from the ordinary steam railroads in every one of the particulars stated in the *Imlay* case. Undoubtedly electric roads do approach steam roads more and more in construction and in manner of operation. But as yet there is a substantial identity in many particulars between the use of a highway by an electric car and that by an ordinary vehicle, both moving upon the same grade. The test, says the Court, whether the land in the street is, by the imposition of the tracks, subjected to a new use must in some measure be a question of degree. So far as the change of power is concerned, the substitution of electricity for animal power, to draw cars running upon surface tracks, is no greater innovation on the ancient uses of a highway than the introduction of the bicycle, with its complicated arrangement of mechanical contrivances for multiplying motion and increasing speed, or the horseless carriage, operated by the use of petroleum.

The question whether the property of the owner of a fee in the highway is subjected to an additional burden depends upon the true limits of the public easement in the highway. Judge Baldwin says that the best definition of a public easement is often that given by public use. A highway is a way over which the public at large have a free right of passage. It is constructed and maintained in their interest. This liberty of passage may always be exercised in such manner as may at the time be customary and reasonable, having in view both the convenience of the public and the proprietary rights of the owners of the soil. As to what is reasonable under these limitations, every age, speaking by its common law, must of necessity judge by its own standard. A common use of the highways in Connecticut for a period longer than the life of a human generation has been that by street railways. So far as horse railroads are concerned, it

was held to be a proper one by the Superior Court in a case decided in 1860.

It appears that since this last mentioned decision—a period of thirty-seven years—the question has not again come up in the Connecticut courts. The decision being that of a lower court, it would not be binding upon the Supreme Court, and Judge Baldwin says there are expressions in the opinion in that case to which the Supreme Court would hesitate to give unqualified assent. Still, no appeal was taken from that judgment, and the doctrine which it announced has so far met with public acquiescence that no owner of the soil subject to a highway has since set up a claim to compensation for the construction of a street railway upon it, until the institution of the present suit. During the intervening period numerous franchises for such railways have been granted and exercised. Many horse railroads have been thus built and many electric railroads. Large sums have been invested in them. Mortgage bonds secured upon their property and franchises have been issued to the amount of millions. This course of legislation, and all that has been done under it, with the support of general public acquiescence, argues the Court, constitute a practical exposition of the common law of Connecticut as to the character of the servitude in the case of a highway which must outweigh any narrower definitions that may have been framed either by the English or American courts, in former centuries and in the presence of different social conditions, however often these may have been repeated in later decisions. The common law definition of the public right in a highway did not embrace in terms, but it did in spirit, its use by public authority for laying water-pipes, drains, cisterns, or hydrants, from which to draw in case of fire, and gas pipes, and as a site for public sign-posts and pumps, and to that extent it has long been enlarged by practical construction.

Judge Baldwin says that every reasonable presumption should be made in favor of the validity of grants by the Legislature of the rights to construct railroads upon highways. "They can be so built or operated as to be a substantial interference with public travel, or to work a new, direct and special damage to the proprietor of the soil. They can on the other hand be so built and operated as to serve the public without injury to the landowner. Charters which, like those of the ordinary steam or standard railroad, contemplate and require a mode of construction or operation of the former description, impose a new servitude on the soil. Charters which go no farther than to authorize such a mode of construction or operation, as one means of accomplishing their purposes, impose no new servitude, and invade no private rights, unless resort is in fact had to such means, in which event they do, and compensation may be required. Two rights are to be guarded with equal care; that of the individual land-owner and that of the public at large; but his estate is the servient tenement. He has no rights which are incompatible with the fullest enjoyment of the public easement. A street railway may be so constructed and operated as to be a proper means of facilitating public travel. It may also be so constructed, but not so operated. It is in such case a means that may be and is abused; but for any abuse the law can supply the remedy. Nor would the legislative grant in such a case avail to deprive the owner of the soil of his right to compensation."

It will be observed that in effect the Court decides that circumstances must control. Electric roads do

not per se entitle the owner of the fee to compensation. But it is possible that they might be so constructed and operated as to damage the property and then compensation would have to be made. In a word, electric railways are far from having unlimited rights in the streets or highways. In this there is substantial accord with the ruling of the Massachusetts Court. Indeed, in remarking that it is in some measure "a question of degree" whether the land in the street is subjected to a new use, the Connecticut Court employs language almost identical with that in the Massachusetts case.

SPEED AND SPEED REGULATIONS.

The ability to afford rapid transit in its fullest sense is undoubtedly one of the chief attractions of the electric road. Hence it follows that wherever circumstances prevent the cars of a company from running both rapidly and regularly, there the company is operating its lines at a disadvantage and its business is artificially curtailed. Conversely, other things being equal, the higher the speed safely attainable the more freely will people ride, whether for business, to save time, or for pleasure and refreshment.

Boston and Brooklyn are cities where congestion of traffic has acted as a material hindrance to the street railways. In Boston, however, the subway now in progress of construction will soon enable the West End Street Railway Company, which has taken a lease of the subway, to run its cars without unnecessary delay. The construction of the elevated railroad also, if carried out in accordance with the plan of the syndicate that is understood to control the West End Company, should in some measure further relieve the pressure of traffic on the surface railway lines.

In Brooklyn, on Fulton Street, for a distance of half a mile, the cars of all the lines of the leading street railway company converging from about ten branches are compelled to traverse one single line of track to reach the New York and Brooklyn Bridge and the Fulton Ferry. The management we know is keenly alive to the disadvantages of this condition of affairs and has striven in various ways to do away with it, but thus far with only slight success. The knowledge of this fact was the basis for a report that recently had some circulation, to the effect that the company contemplated securing control of the Kings County Elevated Railroad, which owns the elevated line on Fulton Street, and would utilize it to facilitate the movement of its traffic. The report, however, has not been confirmed.

In Brooklyn, three years ago, both the traveling public and the surface railway companies were subjected to another form of hindrance to rapid transit that was as annoying to the one as it was financially unfortunate in its results for the other. We refer to the enactment and strict enforcement of ordinances that limited the speed of cars to rates which seem excessively low. The same ordinances, we believe, are still in force, but the same care is not taken to enforce them. So long as fully observed they caused the passengers to complain bitterly of the time spent in transit and in waiting for cars, while for the companies the regulations meant loss of income and increased expenses through the necessity of manning and running a greater number of cars to give reasonably frequent service.

Having in mind this experience in Brooklyn, we were interested to examine the returns obtained by

the "Street Railway Journal" from over forty prominent cities throughout the United States regarding the maximum rate (number of miles per hour) at which the local companies under the terms of their franchise or by a city ordinance are allowed to run their cars. The returns were not tabulated, but we have put them in that form for purposes of comparison.

Nine cities report that the companies are subject to no special restrictions as to speed. These cities are:

I.—NO SPECIAL RESTRICTION.

Chicago, Ill.,	Lynn, Mass.,	Reading, Pa.,
Detroit, Mich.,	Milwaukee, Wis.,	Seranton, Pa.,
Fall River, Mass.,	Pittsburg, Pa.,	Troy, N. Y.

Three large cities—Chicago, Detroit and Pittsburg—are here included. It is reasonable to suppose, however, that if not subject to special restrictions in this respect the companies are still limited by the usual ordinance forbidding "fast driving", so that the lack of restriction cannot be assumed to mean "any speed you please."

Table II. embraces eleven cities that have established one maximum speed for cars in all parts of the city. They are as follows:

II.—ONE MAXIMUM SPEED RATE FOR ENTIRE CITY.

⊖ Law passed before introduction of electricity. No recent law.
 ⊗ Not strictly observed in suburbs.

Even in the small representation of cities here shown we discover a remarkable variation in the maximum speed allowed—from six miles in Minneapolis (where it is "not strictly observed in the suburbs") to fifteen miles in Allegheny, Pa., three cities having the rate eight miles, one seven miles and two twelve.

The third and last table includes those cities which require the street cars to run at a lower rate in some portions of the city than in other portions. They include much the larger number of the whole, being twenty-five in number, as follows:

A Within ¼ mile of the centre of city. B On one business street
 C On High Street between Goodale and Mound Streets. D Within
 radius of ¼ mile from City Hall. E Within one mile from centre of
 city. F Within a radius of ¼ mile from City Hall. G "In some dis-
 tricts", but ordinance not strictly observed. H Rate must not exceed
 12 miles in the city nor 15 miles outside of city. X Including stops.

The highest rate of speed permitted in these twenty-five cities, it appears, ranges from 8 to 15 miles per hour, divided, according to authorized limit of speed, as follows; 8 to 10 miles an hour, eight cities; 12 miles, eight cities; 14 miles (including stops), one city; and 15 miles eight cities. Brooklyn, with 10 miles as a maximum, is near the bottom of the list. Seventeen cities permit a speed of from 12 to 15 miles, being

additional to the nine cities that fix no limit, and to the three cities that permit a speed of 12 to 15 miles anywhere within their limits.

In business or especially crowded districts of these cities the maximum rate, as will be seen, varies from 5 to 12 miles; only one city (Charleston, S. C.,) on one street, prescribing 5 miles as a limit, six cities 6 miles, eleven cities 7-8 miles, six cities 9-10 miles, and one city (Washington, D. C., rich in broad streets,) 12 miles. Brooklyn again is close to the bottom of the list with a limit of 6 miles. Four cities have certain districts within which intermediate rates (8 to 10 miles) are established.

Only six of the twenty-five cities report special limitations of speed at curves or crossings, three of these six fixing the rate on curves at four miles, while at crossings two of them make the rate four miles and one six miles. Special restrictions here seem so wise and necessary that we can scarcely believe they are not more commonly in force. Quite possibly they may exist in a number of instances where the city officials have failed to make mention of them.

From the foregoing summary several facts would seem obvious, viz.: (1) The rate of speed permitted in the several cities varies beyond all reason. If we make the fullest possible allowances for differences of local conditions, still we must admit that either in some places the maximum rate is too low or that in others it is too high. (2) Without passing on the general question what the proper rate would be, the maximum rates of speed established in certain cities are so low (8-10 miles per hour) that it would seem clear they cannot be generally enforced without injustice to the companies and inconvenience to the traveling public. As a matter of fact, indeed, we do not imagine that these low rates are at all strictly observed in any city. (3) It seems better to abide by the old rule and to enact ordinances that can be lived up to rather than those that will be honored only in the breach. (4) As the danger of accident is doubly great at crossings and at curves, it seems proper that the cars should be required to approach these points fully under control, or at considerably less than the usual rate of speed.

We have long thought that the difficulty with regulating the speed of trolley cars lay in the inability of the motormen to estimate correctly, or even approximately, how fast their cars are going. If the stricter ordinances are enforced, a cautious motorman will seek to keep on the safe side and is likely to run unnecessarily slow, to the detriment of the company's earnings and to the annoyance of the public; for how can he, for instance, distinguish between a speed of eight and another of ten miles, one perchance being legal and the other forbidden? On the other hand, a reckless motorman, as all can testify, is often prone to drive his car at a highly dangerous pace, frequently thereby causing accidents. So great is the injury to the company from the running of cars too slow and so serious the damage suits frequently incurred as a result of a reckless speed that it does seem as if some form of automatic indicator could be introduced to advantage that would enable the motorman to ascertain his rate of speed, and that in case of accident would furnish a record to show whether the lawful rate of speed had been exceeded. The thousands of dollars now paid out in settlement of damage claims might thus perhaps be sensibly reduced, and the first

cost of the improvement, if such a one be practicable, be speedily refunded.

BICYCLE COMPETITION.—To what extent the constantly increasing use of bicycles is affecting the business of the street railways it is, of course, impossible to determine with certainty. We may be sure, however, that in many localities it has been the means of checking for the moment the normal increase of traffic and in some few cities has caused a diminution in current receipts. The effect of this form of competition is being felt gradually, not only because it requires time for the country to get accustomed to the new means of locomotion and the many possibilities it affords, but because when the bicycle was first introduced there was only here and there a city so paved as to permit the bicyclists to cross it in various directions with comfort, as is necessary if any great number of them are to ride their wheels regularly between home and place of business. The demand for better pavements, however, has met with wonderfully quick response, and it would appear a matter of only a short time until in most cities the bicyclist will be comparatively free in his movements. The bicycle as an element in street railway calculations will then speedily reach its limit.

In Denver, Rochester and Buffalo complaint of loss of traffic on this score was heard some time ago. Recently it was reported from Chicago that nearly 100 cars had been taken off the lines of a single company because of the growing use of bicycles. Sir Charles Rivers Wilson, President of the Grand Trunk Railway of Canada, acknowledged the similar effect upon a steam road, saying at the annual meeting of the stockholders in London recently that 10,000 bicycles were in use in Toronto alone.

Now all this might seem more or less serious for the street railway business, were it not for the fact that at the same time the bicycle is producing other indirect results which we believe will go far toward compensating the street car companies for their first loss. Everyone physically able to do so is either riding or learning to ride the bicycle. The habit of walking and the love for walking is rapidly, we believe, in consequence giving place to the feeling that walking is a very inferior method of exercise, and an insufferably slow and tiresome means of getting around. A new set of muscles is brought into play, that used in walking being allowed to grow weak. The passion for rushing at the highest speed, always strong in Americans, is stimulated by the constant riding of the bicycle. The temptation to resort to the trolley cars for short distances as well as long is consequently becoming stronger and stronger. If, too, they cannot ride to business, many who returning formerly walked must hurry home as fast as the cars can take them that their time for the bicycle may be as long as possible. Concurrently, there is being nurtured a love for the open country that can hardly fail to further suburban settlement, thus adding to the population feeding the electric lines; and, for the greater number who must continue to reside within city limits, leading them to more frequent excursions to suburban resorts. Is there not some basis then for the belief that the bicycle will eventually in these various ways increase rather than lessen our dependence on the passenger railways.

STREET RAILWAYS.

SECURITIES AND REPORTS.

This is one of our four Supplements. In using the series it is to be remembered that they are inter-dependent publications, complete only as a whole. If utilized together, and with the fresh items of news the CHRONICLE contains from week to week, the investor will have all the information he needs in seeking a safe and remunerative lodgment for his money.

Street Railways forcibly illustrate this inter-dependence. Such roads obviously rely for their income, and therefore in great part for the value of their securities, upon the population and wealth of the country they serve. Hence constant reference to our STATE AND CITY SUPPLEMENT will be found necessary by those wishing to purchase the stocks and bonds of street roads. Population, assessed valuation, tax rate, total debts of the counties, cities and minor municipalities are given at length in that publication, every one of which items is an essential fact contributing more or less to any correct estimate of the amount of suburban travel a given road commands.

The ABBREVIATIONS used in our Street Railway statements will be found explained in a table immediately following the last statement in this Supplement.

A full INDEX which shows where each railroad will be found is also given on the closing pages.

ALLENTOWN & LEHIGH VALLEY TRACTION—A trolley road.

ORGANIZATION.—Chartered May 31, 1893. Owns and operates 45 miles of electric road in the Lehigh Valley in Lehigh and Northampton counties, connecting the city of Allentown with the boroughs of Bethlehem, South Bethlehem, Fountain Hill, West Bethlehem, the Catsaquas and Copley, and the towns of Whitehall, Seigfrieds, Northampton, Aineyville and suburban Allentown. The combined population of towns and villages served by the system in 1890 was 77,315; in 1880 was 51,074. "Franchise runs for 999 years and gives exclusive rights to operate street railways in all said towns, boroughs and city;" company also owns 9 miles private right of way connecting certain of the above-mentioned towns. The control in the property is held through ownership of the entire capital stock of the companies below, which have been absorbed, their entire capital stock (except five shares of each to qualify directors, and a portion of the Electric L. & P. stock not owned) having been placed in trust for the benefit of security holders. Their corporate existence, however, is preserved for legal reasons, valuable rights being conferred by some of their old charters, including the right of eminent domain.
STOCKS OWNED.—The capital stocks of the following companies are owned, except a portion of the Electric L. & P. stock, viz:

BONDS—The first mortgage is for \$1,000,000 and the bonds are guaranteed, principal and interest, by endorsement of the City & Suburban Ry. (See guarantee V. 62, p. 548); trustee is Balt. Tr. & Guar. Co., Balt.

ROAD—Owns 9½ miles double track, 1½ miles single track, road in Baltimore, part of which is an elevated steel structure. From Roland Park there is a branch line to Lakeside Park, a picnic ground owned by the Elevated Co.—V. 62, p. 413, 547; V. 64, p. 951.

CONSOLIDATED TRACTION CO.—

ORGANIZATION, ETC.—Formed in 1897 by consolidation of the Baltimore Traction and the City and Suburban System. Capital stock will be about \$9,000,000. Company will assume the bonded indebtedness of the lines merged to a total of \$10,550,000, but it is said will not issue bonds of its own. The combined roads will aggregate about 190 miles of track.—V. 64, p. 951.

COLUMBIA & MARYLAND RR.—A trolley road.

ORGANIZATION, ETC.—Incorporated in March, 1892, to build a trolley road from Baltimore to Washington, 38 miles. On August 7, 1895, contract for building entire road was awarded.—V. 61, p. 239. The Maryland & Washington Ry. of D. C. gives entrance into Washington. The Columbia & Maryland owns 10,625 shares Eckington & Soldiers' Home and 5,003 shares Belt Railway stock turned over by the Baltimore & Catonsville Construction Co. The Belt Ry. and Eckington & Soldiers' Home roads were placed in receiver's hands Sept. 21, 1896.—V. 63, p. 559.

COMMITTEE—A reorganization of the C. & M. is under way.—Committee—T. Edward Hambleton, Baltimore; Bernard N. Baker and Thomas M. Lanahan—See V. 64, p. 610. It is estimated that about \$500,000 cash will be needed to carry out the plan.

Construction Co. Receivership.—The Baltimore & Catonsville Construction Co., which is building the C. & M., was placed in hands of Receivers T. Edward Hambleton, Richard Morton and James Bond on Sept. 15, 1896. Settlement of claims was reported made in May, 1897, on basis of 75 p. c. cash and 25 p. c. in C. & M. RR. stock.—V. 64, p. 610.

Elkins, of Philadelphia.—V. 63, p. 28, 356, 458, 504, 559; V. 64, p. 610.

FALLS ROAD ELECTRIC RAILWAY.—

ORGANIZATION ETC.—Has secured the charter for a trolley line in the northern suburbs from North Charles Street to Mount Washington and vicinity. The road will be double tracked and seven miles long. It is expected to flush the road by Sept. 15, 1897, and then consolidate with the Pikesville R. & Emory Grove under title of Baltimore & Northern Electric Ry., which will issue \$1,000,000 stock and \$1,250,000 of 5 p. c. bonds—See V. 64, p. 887. Gen. Man., George R. Wehler, Equitable Building, Baltimore.—V. 64, p. 887.

METROPOLITAN RAILROAD—To be an underground trolley road.

ORGANIZATION—Formed in 1896 to build an extensive cross-town street railway system connecting the three parks, to be operated with underground trolley. The company offers to lay grooved rails flush with the pavement, and to sell six tickets for 25 cents.

STOCK—The authorized capital stock is \$2,000,000.
INCORPORATORS—E. Southard Parker, of Washington, D. C., President of the Columbia National Bank; A. C. Stevens and J. S. Lawrence, of Washington; Charles P. Jannoy, of Leesburg, Va.; A. S. BROOKLYN, N. Y.

POPULATION 1890 WAS 806,343; IN 1880 WAS 566,653; AND IN 1870 WAS 396,099.

BROOKLYN RAPID TRANSIT.—(See Map on page 19.)

ORGANIZATION—A New York corporation organized in January, 1896, per plan in CHRONICLE, V. 60, p. 1145, to succeed to the property of the old Long Island Traction Company (see SUPPLEMENT November, 1895), foreclosed; syndicate headed by ex-Governor Flower having bought control. Cars will run over the Brooklyn Bridge. See V. 64, p. 798.

ASSETS—The property purchased includes (1) the lease of the Brooklyn City RR., (2) the entire capital stocks of the Brooklyn Heights RR. (\$200,000) and Brooklyn Queens County & Suburban Ry. \$2,000,000, and (3) a guarantee fund deposited to secure the faithful performance by the Brooklyn Heights Company of its contract with the Brooklyn City RR.

The guarantee fund, originally \$4,000,000, was drawn upon for \$250,000 by the Long Island Traction Company in July, 1894, as permitted by the trust deed, but on May 1, 1897, it contained securities estimated as worth \$3,938,700, as follows: Brooklyn City RR. consol. 5s, par value \$1,630,000, market value \$1,858,200; Brooklyn Queens County & Suburban bonds \$2,000,000, market value \$2,080,000; cash, \$500; total market value as above, \$3,938,700.

The Brooklyn City RR. Co. is held under a 999-year lease, dated Feb. 14, 1893, guaranteeing all charges and 10 per cent dividends on \$12,000,000 of stock. The lease is nominally to the Brooklyn Heights RR. Co. but practically to the Brooklyn Rapid Transit Co., since that company owns the entire capital stock of the Brooklyn Heights Company and guarantees payment of dividends to lessor, as said above, by special fund in hands of trustees.

In the reorganization the old \$30,000,000 of Long Island Traction stock paid an assessment of \$10 per \$100 share, the old stock being reduced to \$20,000,000, and \$7,000,000 o. 5 per cent bonds being authorized, against \$3,000,000 of Long Island Traction.

The capital stock is to be held in a voting trust for five years, the trustees being R. P. Flower, F. P. Olcott and A. N. Brady.

Bonds—Of the \$7,000,000 fifty-year 5 per cent gold bonds, \$1,875,000 took up collateral trust notes, \$3,000,000 went to stockholders for the assessment; balance for future requirements of the road. For description of property covered by the mortgage see V. 62, p. 1138. In March, 1897, bonds for \$306,000 were listed, issued for construction etc. V. 64, p. 753.

BROOKLYN ELEVATED RAILROAD—

A steam road, to be made electric. **RECEIVERSHIP**—On March 23, 1897, President Frederick Uhlmann was appointed receiver.

REORGANIZATION—Committee: F. P. Olcott, Chairman, James T. Woodward, Charles Parsons, Ernst Thalman and Leonard Lewisohn. In May, the plan was declared effective, over 80 per cent of the various issues of bonds having assented.

Plan—The plan was given in V. 64, p. 609. All the mortgages of the Brooklyn, the Union and the Seaside & Brooklyn Bridge companies are to be foreclosed, and their properties transferred to a new company, which will issue thereon the following new securities: (1) First mortgage for \$16,000,000 gold bonds, due 1950, at 4 p. c. until 1905 and 5 p. c. thereafter; (2) preferred 5 p. c. non-cumulative stock, \$5,000,000; (3) common stock, \$13,000,000.

Distribution of New Securities—The old bonds and stock (paying assessment) receive:

¶ NOTE—Pending reorganization this amount will be paid for each coupon maturing after April 1, 1897.

The cash contributions levied aggregate \$1,921,500 and are to be payable as called by the committee.

Fixed Charges—Only \$11,890,000 first mortgage bonds will be needed to carry out the plan, and the present yearly fixed charges are estimated as follows: Interest on firsts at 4 p. c., \$475,600; taxes (est.), \$108,000; total, \$583,600 (old fixed charges were \$882,033).

Coupon Payments—Coupons of April, 1897, and subsequent dates are in default, but for all bonds deposited under the reorganization plan the committee, through the Central Trust Co., is paying interest as it matures at the following rates: On the first mortgage bonds of the Brooklyn Elevated, Union Elevated and Seaside & B'klyn Bridge, \$20 per coupon; on Brooklyn Elevated 2d mortgage, \$14 per coupon. These are the cash payments provided for under the plan above.

Union Elevated mortgage trustee is Central Trust Co. Abstracts ia V. 49, p. 583. See also V. 48, p. 129; V. 49, p. 471.

ROAD—Owns from Fulton Ferry to East New York, 5-73 miles; Broadway and Lexington Avenue to Broadway Ferry, 2-78 miles, and Myrtle Avenue to Adams Street and Brooklyn Bridge, 4-82 miles; branch to Greenwood, 3-58 miles; Seaside & B. B. E. RR. to Cypress Hills, 1-4 miles, and to 65th Street, 1-8 miles; total, 20-11 miles; second track, 20-11 miles; total track, 40-22 miles. Cars are run (since May 17, 1896,) from Brooklyn Bridge, via Union Station at 36th Street and 5th Avenue, over the old Prospect Park & Coney Island to Coney Island.

EQUIPMENT—Locomotives owned, 78; leased, 19; passenger cars owned, 226; leased, 60.

GENERAL FINANCES—State taxes have been paid, but municipal taxes for 1895 and 1896 are in dispute in the courts—see V. 64, p. 80. Loans (hills payable) Dec. 31, 1896 (secured by \$1,210,000 Seaside & B. B. firsts) were \$605,000, having been increased \$195,000 during the year; there was due "operating fund" \$166,172.

ANNUAL REPORT—Report for year ending Dec. 31, 1896, was given in V. 64, p. 80. "Fixed charges" include all State and municipal taxes; but the municipal taxes on the structure have not been paid. Excluding local taxes on structure the deficiency for 1896 would be \$75,235. Increased earnings in 1895 were due to strike on trolley roads.

absorbed. In February, 1896, agreement was made to lease the elevated extension of Brooklyn & Brighton Beach RR., about 1/4 mile, and about 3 miles of trackage additional, for rapid transit purposes. Through trains are run to Brighton Beach; see V. 63, p. 754. Cars will run over the Brooklyn Bridge. V. 64, p. 798. Connection is to be made with the Long Island Electric for the running of through cars to Far Rockaway.—V. 64, p. 330.

RECEIVERSHIP—Aug. 31, 1896, President James Jourdan was made receiver. See V. 63, p. 402. Consolidation with the Brooklyn Elevated is said to be under consideration.—V. 64, p. 754.

REORGANIZATION—In May, 1897, it was stated that a plan would probably be announced in four or five weeks. Electricity is to be introduced.

Floating Debt—The company's floating indebtedness August, 1896, was stated as follows: Bills payable secured, \$211,700; on time, \$7,500; open supply accounts, \$50,000; wages, \$7,500; interest due on Sept. 1 on Fulton Elevated bonds, \$63,575. The available cash resources are \$5,000. Accrued taxes to Mar. 31, 1896, of \$138,309.

KINGS COUNTY TRACTION CO.—ORGANIZATION—Incorporated in March, 1896, and purchased the assets of the Brooklyn Traction Co., owning all the capital stock of the Atlantic Avenue RR. The Atlantic Ave. and Brooklyn Bath & West End lines (old Brooklyn Traction System) were leased in 1896 for 999 years to the Nassau Electric RR.; therefore the Kings County Traction does not operate any road, but merely receives the rental due from the Nassau Electric and distributes it to the Traction Co. stockholders. The annual rental is as follows: \$150,000 for first two years from February, 1896, and \$180,000 thereafter.

STOCK—The Kings County Traction capital stock is \$4,500,000; par \$100. DIVIDENDS—In 1897, on Jan. 25, 1 per cent, payable at Central Trust Co., New York.—V. 62, p. 636, 820; V. 64, p. 83.

LONG ISLAND ELECTRIC RAILWAY—A trolley road.

ORGANIZATION—Chartered March 5, 1894. Road is to run from Crescent Ave., at the terminus of the Kings Co. Elevated to Jamaica, Hempstead, Far Rockaway, etc. Road opened to Jamaica in July, 1896, power being furnished by Brooklyn City road. It is expected to have the road completed to Far Rockaway in 1897. Through connection is made to the Brooklyn Bridge over the Kings County Elevated Railroad.

Do Ziegler bonds (text) } 1893 - J-J 610,000 July 1, 1928
Bills payable Dec. 31, '96. 775,860

Due on coupons unpaid (owned in interest of Columbia Construction Co.) \$67,575 on Dec. 31, 1896, reduced by \$65,000 during the year.

Trustees of 1st mortgage (see V. 64, p. 373), Equitable Trust of Chicago and Am. Trust & Savings Bank, Chicago.—V. 62, p. 1087.

Note.—The total issue of first mortgage bonds was \$7,574,000, of which in April, 1897, \$934,000 had not assented to readjustment plan of 1895. Of these last \$104,000 were in the treasury, while \$610,000 held by Mr. Ziegler were still in litigation and with \$76,000 others were receiving no interest, and \$144,000 additional are allowed to receive interest at 3 per cent per annum, or 60 per cent of face of coupons. See V. 62, p. 233, 869, 908, 949. Holders of first mortgage bonds who assented to plan received in exchange for their principal 60 per cent in guaranteed debentures (total issued \$3,944,400, of which \$181,200 in treasury), and 15 per cent in incomes (total issue \$986,120, of which \$45,320 in treasury).

Stock—In May, 1896, trust certificates representing Lake Street stock for \$5,009,300 was offered to stockholders of Columbia Construction Co. at \$18-90 a share; the stock itself will be held in a ten-year voting trust.—V. 62, p. 908. In October, 1896, it was reported that the Union Elevated RR. controlled 35 per cent of these trust certificates, thus preventing a termination of the trust, as the consent of 80 per cent of the certificates is required.

Bonds—The gold debentures are secured by deposit of the old bonds with the Northern Tr. Co.; their p. and i. are guaranteed by the Northwestern Elevated RR. Co. When all the old bonds have been exchanged, they are to be stamped payable as to principal and interest at 60 per cent of their face value and reassued in exchange for the debentures. The trust deed securing the mortgage bonds was to be modified so that no further bonds shall be issued for construction, except at par, and only for actual cost of the construction.

ROAD—Owns in Chicago a double-track elevated railway, Market Street from Madison Street to Lake Street, thence to the Western city limits, being 6-2-5 miles, equal to 14 1/4 miles of single track. Trains began running over the Loop line in March, 1897.

REPORT—Fiscal year ends Dec. 31. Report for 1896, V. 64, p. 177.

Bonds.—Of the \$12,500,000 consols under the mortgage of November, 1896, \$3,969,000 can be issued only on retirement of an equal amount of the outstanding first mortgage 5s, and \$2,500,000 for improvements and extensions at 75 per cent of the cost thereof. In February, 1897, a sale of \$6,000,000 of the consols was made to a syndicate; the proceeds were used to retire \$2,000,000 debentures in April 28, 1897, and the floating debt, and bonds are reserved to retire the \$700,000 debentures subject to call in 1900. See V. 64, p. 176, 333, 472.

Stock.—The authorized stock was \$10,000,000, but the stockholders Jan., 1893, authorized an increase to \$20,000,000. In accordance with this additional issue were made—April 1, 1893, \$1,000,000; Aug. 1, 1893, \$1,100,000, and Nov., 1893, \$1,089,000.

Chicago West Division Stock is \$1,250,000, of which \$625,100 is owned by the West Chicago Street Co., the remainder (\$624,900) being guaranteed 35 per cent yearly under the lease. Chicago Passenger Railway stock is \$2,000,000, having been increased from \$1,000,000 in 1896. The West Chicago St. RR. Co. guarantees, under operating contract, 5 p. c. on original \$1,000,000 stock, of which \$730,000 is owned by West Chicago, as is also \$730,000 of the issue of 1896.

Suit brought by City of Cincinnati to remove tracks at foot of inclined plane. Cincinnati claims the company had no right to issue bonds, as they possessed no vested right or charter giving them the use of the streets after a certain date. Judge Sage sustained this claim of the city, and decision was confirmed by U. S. Supreme Court in Dec., 1896, but a six months' stay was granted Dec. 19, 1896, preventing the tearing up of the tracks, and application has been made for a new charter. METROPOLITAN STREET RAILWAY—Cable, horse and trolley. See map on page 45.

ORGANIZATION—Incorporated July 19, 1886. In May, 1894, the company secured control, by purchase of all the capital stock, of the Kansas City El. (20-53 miles) and assumed the debt of that company. In like manner it controls Kansas City & Rosedale St. Ry. and South Suburban St. Ry. In June, 1895, the charters of all the constituent companies were extended to 1925.—V. 60, p. 1105.

In May, 1895, the company absorbed the Kansas City Cable Ry., Grand Ave. Ry., West Side Ry. and Kansas City & Independence Railway, with an aggregate trackage of 67.7 miles. The lines which it has acquired "occupy most of the territory east of the Union Depot, the Metropolitan Company occupying all of the important territory west of the Depot and some of the principal streets on the east side." The consolidation brings under one management all of the principal street railroads of the city.

Capital stock—The capital stock is \$20,000,000, of which \$17,000,000 is common stock and \$3,000,000 is 7 per cent cumulative preferred stock on which interest is payable quarterly. All dividends on preferred to and including April, 1897 (1¼ per cent), have been paid. For the preferred stock it is provided that if in any year dividends amounting to 7 per cent are not paid on said stock, the deficiency shall be a charge upon the net earnings of the company, and shall be paid subsequently before any dividend shall be paid upon or set apart for the common stock. In case of liquidation or dissolution of the company the holders of the preferred stock shall have prior right on the assets of the company before any amounts shall be payable to the holders of the common stock.

See full description of property in application to the New York Stock Exchange in June, 1895.—V. 60, p. 1148.

Bonds.—The Minneapolis Street Railway Co. jointly and severally with the Minneapolis Lyndale & Minnetonka Railway Co. has issued \$5,000,000 5 per cent 30-year first mortgage and first consolidated mortgage gold bonds, of which \$940,000 are held in trust by the Farmers' Loan & Trust Company to redeem the \$940,000 prior lien bonds. See statement to N. Y. Stock Exchange in June, 1895. The consols are also listed in London.—V. 60, p. 1149.

The St. Paul City Railway Company has issued \$4,298,000 5 per cent 50-year cable consolidated bonds (including \$680,000 held by the Farmers' Loan & Trust Company, trustee, to redeem the \$680,000 prior lien bonds above) under a mortgage limited to \$5,500,000. Under the mortgage these bonds can only be issued against the actual cash cost of construction, under a mileage limit of \$15,000 per mile. Part of these consols (\$1,138,000 on June 11, 1895), are guaranteed, principal and interest, by endorsement of Twin City R. T. Co. See statement to N. Y. Stock Exchange in June, 1895.—V. 60, p. 1150.

The certificates of indebtedness (notes) were issued to the Twin City Company by the Minneapolis Street Railway and St. Paul City Railway, and guaranteed by it. Original issue by each company, \$1,000,000; outstanding Dec. 31, 1896, \$625,000 each, or \$1,250,000 in all, of which \$225,000 held by the Twin City Company.

ROAD—The entire system now consists of 225 miles of standard-gauge road, of which 219 miles is electric and 6 miles cable, all of which has been recently built or rebuilt, and thoroughly equipped. A double-track electric line, 9 miles long, connects the business centres of the two cities.

On the principal streets of the cities 80-lb. rail with welded joints and imbedded in concrete was used.

GENERAL FINANCES—On Dec. 31, 1896, there was 7 per cent preferred stock for \$1,862,800 in the treasury with which to liquidate the balance of the 6 per cent certificates (\$625,000) and bills payable (\$425,469). The payment of the balance of the 6 per cent certs. will eliminate all indebtedness of the underlying companies except the \$10,298,000

of bonds. By this transaction the interest charges will be reduced to \$544,500 per annum.

The company has leased water power at St. Anthony's Falls (plant to be completed in August, 1897)—capacity 10,000 h. p., which will effect a large reduction in cost of motive power.—see V. 64, p. 704.

MANHATTAN (ELEVATED) RAILWAY—See INVESTORS' SUPPLEMENT.

METROPOLITAN TRACTION—

ORGANIZATION—Organized under laws of New York to construct and control railways in New York City. Its system, which covers the Broadway Cable line, traverses all parts of the city and embraced in May, 1897, 190 miles of lines, operated as follows: By cable (single track), 25.34 miles; by underground electricity, 6.66 miles, and by horses, 159 miles. Of this mileage, 49.83 miles, including the Broadway Railway and its extensions, are owned in fee by the Metropolitan Street Railway Co. (whose stock is all owned by the Traction Company) 24.12 miles are held under lease, with the additional security of two-thirds of the stock of the subordinate companies being owned by the Traction Company, and 91.60 miles are held under long leases, in no instance less than 99 years. V. 62, p. 278.

LIQUIDATION OF COMPANY—The directors on Nov. 17, 1896, voted to wind up the company's affairs, to give the stock of the Metropolitan Street Ry. (\$30,000,000), which it holds in its treasury in exchange, share for share, for its own outstanding stock, but to May 25, 1897, no final action had been taken.

METROPOLITAN TRACTION SYSTEM—METROPOLITAN STREET RAILWAY—

ORGANIZATION—Chartered in 1893, and became the operating company of the Metropolitan Traction System, it having absorbed or taken over the leases of all the other roads completed and in operation. In Nov., 1893, absorbed the Houston West St. & Pavonia Ferry, Broadway Surface and South Ferry roads. In May, 1894, consolidated with Metropolitan Crosstown and Lexington Avenue & Pavonia Ferry companies, and in November, 1895, with the Columbus & Ninth Avenue.

Leased the Eighth Avenue Railroad for 99 years from Jan. 1, 1896, at rental of \$215,000 per annum, payable quarterly, the lessee guaranteeing to spend \$1,000,000 within two years for improvements, change of motive power, etc.; betterments to revert to lessor at expiration of lease; lessee pays taxes.—V. 62, p. 40. Leased the City Line of the N. Y. & Harlem R.R. Co. for 900 years from July 1, 1896, at a rental of \$350,000 for first five years and \$400,000 thereafter. The 34th Street line was opened Jan. 10, 1895. It is proposed to lease the Second Avenue line—see V. 64, p. 235.

It is proposed to introduce the underground electric system on the Fourth, Sixth and Eighth Avenue lines.—See V. 63, p. 1063; V. 64, p. 330. Company's possession of Eighth Avenue line was confirmed in May, 1897 (V. 64, p. 1001).

Control of the Central Crosstown, it is said, was acquired in May, 1897, in interest of Metropolitan St. Ry.—see V. 64, p. 1001.

FEDERAL STREET & PLEASANT VALLEY RAILWAY—A trolley road.

ORGANIZATION.—Incorporated March, 1868, and on July 12, 1839, consolidated with the Observatory Hill and People's Park companies. The leased lines (Allegheny & Bellevue, Allegheny Street, Perry Street and Troy Hill companies) were taken in by consolidation in April, 1892, and their stocks wiped out. The franchise is perpetual.

The North Side Traction Co. (which see below) on July 20, 1896 leased the Federal Street & Pleasant Valley for 960 years, assuming its funded debt of \$1,250,000 and its floating debt of \$175,000, and agreeing to pay as rental all taxes, rentals, etc., and also \$70,000 yearly in cash, payable January 15 and July 15, equal to 5 per cent on the \$1,400,000 stock. The North Side Company is understood to have purchased a majority of the stock and to be offering its own stock in exchange for the balance.—V. 63, p. 31, 76, 189.

McKEESPORT DUQUESNE & WILMERDING RAILWAY.

ORGANIZATION.—This company includes the Citizens' Street Railway of McKeesport, the McKeesport & Wilmerding and the White Electric Traction. The last-named company in 1893 had a bonded indebtedness of \$35,000 6 per cents, due 1911. In February, 1896, control was said to have been acquired in the interest of the Second Avenue Traction Company of Pittsburg.

In April, 1897, application was made for a receiver. (V. 64, p. 707.) It is understood, however, no action will be taken until June 1, when the first mortgage interest becomes due.

NORTH SIDE TRACTION.

ORGANIZATION.—Organized in 1896 by parties interested in the Second Avenue Traction and United Traction companies to lease the Federal Street & Pleasant Valley Ry.

In January, 1897, Second Avenue Traction stockholders voted to lease that road to North Side Traction for 999 years at a rental of 5 per cent on the money invested. V. 64, p. 235. The transfer of the F. S. & Pleasant Valley is a practical sale of the road, made, owing to the law under which the present charter was secured, in the nature of a lease for a term of 950 years on a guaranteed annual rental of 5 per cent, payable Jan. 15 and July 15, 1897, and each succeeding year, to the Pittsburg Trust Co. of Pittsburg. The lease provides that the present stockholders can change their stock for stock in the North Side Traction Co. or can retain their present stock with a guarantee of 5 per cent as a dividend. The North Side Traction will be controlled by the United Traction Co.—V. 63, p. 31, 76, 189, 794, 881, 1064; V. 64, p. 235, 664.

PITTSBURG ALLEGHENY & MANCHESTER TRACTION.

ORGANIZATION.—Incorporated Dec. 14, 1889, and July 25, 1890, leased Pittsburg Allegheny & Manchester Passenger Railway (5 miles of road, stock \$350,000, no bonds) for 999 years and Pittsburg Union Passenger Railway (stock paid in \$82,775, bonds \$100,000 as below) for 985 years—see V. 64, p. 1001

Bonds—Total issue limited to \$8,000,000, with provisions for increasing the issue by not over \$1,000,000 for actual cost of new track (including equipment) within 19 miles of the City Hall of Providence, R. I., and additional to 104 miles of track, but at a rate not exceeding \$12,000 per mile of such new track. Under this provision \$247,000 of bonds were issued in 1895 against new mileage. The bonds are secured by mortgage on all the mortgage bonds and all the stock of the Union Ry. Co. of Providence and all the stock of the Pawtucket Street Ry. Co.

The Providence Cable Tramway Co. is leased to the Union Railway Co. for 50 years for 6 per cent on its capital stock, all but two shares of which is owned by the Union Railway Co.

ROAD.—The companies above mentioned were operating early in 1893, in the cities and towns designated about 82½ miles of track. During 1894 this road was equipped with electricity, and 21½ miles were built, making a total of 104 miles. In August, 1896, there were completed and in operation 129-7 miles, which include 7-3 miles of the Pawtucket Valley Electric Street Railway.

SECURITIES PLEDGED.—These in February, 1896, included all of the \$2,000,000 capital stock of the Union RR. of Providence, all of the \$200,000 capital stock of the Pawtucket Street Ry. (no bonds) and all of the \$3,000,000 first mortgage bonds of the Union RR. of Providence. The Union RR. owns \$299,800 of the \$300,000 capital stock of the Providence Cable Tramway Co. (no bonds).

TREASURY SECURITIES.—The United Traction & Electric Co. has in its treasury \$361,800 of the \$400,000 capital stock and \$150,800 of the \$199,000 first mortgage bonds of the Pawtucket Valley Electric Ry.

All the above-described roads of the United Traction & Electric Co., including the Providence Cable Tramway, are now operated by electricity, and since completion of the electrical equipment in April, 1894, the large increase in the earnings anticipated has been fully realized.

RICHMOND TRACTION CO.—(See Map on page 74.)—An electric road.

ORGANIZATION—Incorporated August, 1895. Road opened for business June 19, 1896. About twelve miles of track now in operation and five miles additional under way, which will make a total of 17 miles. This company operates a double-track electric line the full length of Broad Street, one of the principal thoroughfares of the city of Richmond; also several branches radiating into different thickly populated sections of the city. In the equipment and construction of this railway the latest inventions and developments of electrical and mechanical science have been utilized throughout.

The tracks of the company within the city are laid with 95-lb. steel girder rails, on white oak cross-ties for a considerable portion of the distance, embedded in concrete, and along streets paved with granite blocks. The lines in the suburbs are laid with 60-lb. steel T rails.

The company owns its power house, brick and steel car house, etc. Its generators and motors are made by the General Electric Company of New York. The population of Richmond and its suburbs, including Manchester, is estimated at 115,000.

RICHMOND RAILWAY & ELECTRIC CO.—(See Map on page 75.) Operates an electric railroad and electric-lighting plant.

ORGANIZATION—The following description has been furnished the SUPPLEMENT by the fiscal agents of the company: "Organized in 1890 by consolidation of three street railway and three electric-lighting companies. The company occupies the principal streets of Richmond and Manchester, thus furnishing street railway facilities to over 100,000 people. The system embraces about 70 miles of track, including suburban roads, and by its system of transfers passengers are carried over all the city and branch lines for a single fare."

"The construction of the railway and the equipment is first-class in every respect, the power houses being ample for handling all the traffic of the two cities, present and prospective. This company supplies the entire electric lighting for the two cities, having exclusive contracts with both municipalities."

 Cert. of indebtedness, 1896 6 A-O 250,000 Oct. 1, 1906

First mortgage of 1895 was authorized by Congress for the sole purpose of changing the motive power from horses to electricity. It covers all the company's rights, privileges and franchises, together with valuable real estate. This real estate has been appraised at \$700,000 and is said to be worth over \$1,000,000. A sinking fund from sale of unused real estate may purchase bonds at not over 110 and interest.

The collateral trust bonds are convertible into stock at option of holder at the ratio of one share of stock (par \$50) for \$100 of bonds; they are secured by deposit of 5,000 shares of the company's stock.

The certificates of indebtedness were issued in Sept., 1896, for equipment.

Stock—The stockholders, besides being liable for the remaining \$20 per share, are liable under the provisions of the charter for an amount equal to their share holdings. In addition to the stock given above in table as outstanding, 5,000 shares are held by trustees as security for the collateral trust bonds.

Dividends—From 1869 to October, 1894, inclusive, regular dividends were paid, the rate in 1894 being 8 per cent per annum; then none until September, 1896, 2 1/2 per cent.

REVIEW OF DECEMBER.

The improvement in the situation which occurred in November as the result of the triumph of the Sound-Money cause at the polls was not fully maintained in December; or perhaps it would be more accurate to say that the hopes so confidently entertained of further decided development in the direction of business revival were in great measure disappointed. Possibly the expectations of a sustained expansion in industrial activity were in any event pitched too high, seeing that we were near the end of the year, when it is customary to close accounts for the twelve months and when also temperature and weather conditions usually impose obstacles to out-door work and thus reduce to a minimum operations in many lines of trade.

In the main, however, the fact that trade recovery failed to make the progress expected may be ascribed to the occurrence of a number of special retarding influences and set-backs. Congress, as usual, has proved a disturbing factor. It quickly became apparent, after the members assembled, that notwithstanding the emphatic popular verdict given at the election, nothing would be done at this session to correct the evils of our currency system, nor anything to remove the inequalities between Government disbursements and Government revenues; while both in and out of Congress, even among those high in party councils, there were manifestations of a spirit which suggested a willingness to encourage renewed temporizing with the silver issue.

Worst of all, the attitude and action of the Senate in the matter of the Cuban insurgents introduced an element which has proved thoroughly disorganizing to business. Quite a number of radical bills were presented in that body, one going so far as to direct the President to take possession of Cuba by military force,

and on Friday the 18th the Committee on Foreign Relations made a report said to be unanimous tending to at once disturb our relations with Spain. Among the resolutions which had been referred to that committee was one by Senator Cameron recognizing the independence of the "Republic of Cuba." Unexpectedly the committee reported this resolution favorably on the 18th, causing an immediate sharp break in the stock market and creating a feeling of anxiety and uneasiness throughout the whole country. Fortunately Secretary of State Olney met this move the next day by the announcement that Congress had no power to hinder the President in a matter of this kind, that the recognition of a foreign State was an Executive function alone. It also became apparent that public opinion did not sustain the step proposed, and when the report came before the Senate on Monday the 21st action on it was postponed until after the holidays. Nevertheless the affair induced timidity and fear and thus imposed a check on enterprise.

As showing the unsettling effect caused by the doings of Congress, an interview with Mr. Obanney M. Depew published in the "New York Times" of the 31st is pertinent. Speaking with reference to the relations between Washington and the business interests of the country Mr. Depew pointed out that the conditions now are excellent and ripe for good times. Nearly every doubtful scheme, enterprise, firm and corporation which could affect credit by failure has been forced to liquidate and business has not for a quarter of a century been in so conservative a state, and so near a cash basis, as at present. The distrust existing during the past three years has given a shock to credit and has made it abnormally sensitive. What is mainly needed, therefore, is to cultivate confidence, without which there can be no great activity in trade. Congress holds the key to the situation. Uncertainty as to its action upon the Cuban question, coupled with a possibility of a war with Spain; uncertainty as to its action on the tariff, on the currency, and upon the revenue and expenditures, keeps foreign capital from coming to this country. Such capital would be invested in new railroads, mining and irrigation developments and manufacturing enterprises, all of which are now waiting. Mr. Depew then states that the effect of the Cameron resolution was felt instantly in the falling off of the traffic of the railroads of about 15 per cent.

Another unsettling influence during the month was the occurrence of quite a number of bank failures in various parts of the country. The most important of these was the closing of the National Bank of Illinois at Chicago with liabilities of about 11 million dollars. The failure of this institution pulled down a number of concerns which had depended on it for assistance and were the cause of its collapse. Subsequently there were failures of banks or banking institutions in other parts of the Northwest—at St. Paul, Minneapolis, West Superior, etc., and likewise some failures in the South and Southwest. As far as can be judged, these embarrassments were the result of unsound banking methods rather than of unsound trade.

In consequence of the return to the channels of circulation of money previously hoarded, or which had been held in reserve out of caution against the possibility of a change of monetary standards, there were further large accumulations of currency at this center, keeping money easy; and of course the fact that there was no considerable demand for currency for trade purposes contributed to the same end. On November 7 both the loans and the deposits of the New York Clearing House banks were at the lowest point of the year. On December 26th both were at their highest points. The deposits between these two dates rose from \$438,437,600 to \$525,837,200, the addition thus being over 87 million dollars. The loans in the same interval increased only 45½ million dollars. It is needless to say that money rates ruled low throughout the month. Even the special call on this center from the West, arising out of the bank failures in that section, had only the effect of slightly stiffening the market. The following shows the rates for the various classes of loans for each week of the month. We may say that a feature in the market was the making of loans on sterling exchange as collateral. Some of these loans, running from 75 to 100 days, were placed at 2½ per cent.

Our foreign trade remained in a highly favorable state, showing a very large balance on the side of the merchandise exports. The price of wheat, after tending downward for a time, again advanced, cash wheat in New York commanding over a dollar a bushel. The price of cotton sharply declined, and low middling uplands closed on December 31 at 6 13 16 cents per pound, against 7 5 16 cents November 30. The Treasury continued to gain gold, and December 31 the reserve was reported at \$137,316,544.

The course of the exchange market furnished evidence of the favorable conditions ruling in the foreign trade. From the 8th to the 18th the tendency of sterling was strongly upwards, and while the rates did not justify gold exports to Great Britain, it was thought that some amounts might go to Berlin. But subsequently the market decidedly weakened again, thus for the time being precluding the possibility of any

outflow. This weakness at the period when such large remittances have to be made to meet January interest payments on the other side was significant and remarkable. The following gives the rates for sterling on actual business for every day on which a change in any class of bills occurred:

The stock market was weak most of the month, on a small volume of business. The returns of railroad earnings for November were very unfavorable as a rule, and while some improvement occurred in this respect in December, it did not meet expectations. The roads in the spring-wheat sections particularly made poor comparisons, because the wheat movement the previous year had been of extraordinary magnitude. The action of the Senate Committee on Foreign Relations on the 18th proved a wholly unexpected blow, prices falling away several points and the market becoming almost panicky. There was some recovery subsequently from the lowest figures, but transactions were on a limited scale. Below we furnish a record of the bond and stock sales at the Exchange for the month and year, in comparison with the three years preceding; and also the sales of cotton at the Cotton Exchange and of grain on the Produce Exchange.

GENERAL QUOTATIONS.

—OF—

BONDS AND STOCKS.

Subscribers ought this month to notice particularly Explanation No. 2 given below.

- In the following twenty-seven pages of tables quotations are given for all securities listed on any Stock Exchange in the United States; also for all leading unlisted and inactive securities for which we have been able to obtain reliable prices.
- Quotations from all Stock Exchanges are as near as possible for the last day of December. Of course the coupon, if there be one, maturing between the date of quotation and the date of this publication, is not deducted from the price.
- Bond prices marked thus (*) are flat prices—that is, the purchaser does not pay accrued interest in addition. Stock prices marked thus (†) are per share. All others are per cent except bank stock prices.
- It should be borne in mind in the use of these tables that the quotations for many inactive and unlisted securities are merely nominal, but in all cases the figures are obtained from sources which are considered reliable.
- The following abbreviations are often used, viz.; "M.," for mortgage; "g.," for gold; "g'd.," for guaranteed; "end.," for endorsed; "cons.," for consolidated; "conv.," for convertible; "s. f.," for sinking fund; "l. g.," for land grant.

MUNICIPAL BONDS.

It should be borne in mind that municipal bonds are not subject to such decided fluctuations in value as are securities which form a basis for speculation.

Prices marked (*) are flat prices—that is, the purchaser does not pay accrued interest in addition.

The figures in the column "to net" indicate the basis on which the securities sell or the interest rate which the securities, if held to maturity, will net to the purchaser at the present market price.

Table with columns for Bonds, Bid, Ask, To Net, listing various municipal bonds from states like Alabama, Arizona, Arkansas, California, Colorado, Connecticut, and others, including bond descriptions and prices.

* Flat price.

† Quotations of Canadian securities are from Montreal.

REVIEW OF JANUARY.

While our industries continued depressed during January, and there was little evidence of activity in any department of business, the outlook nevertheless improved in some important respects.

In the first place, irritating action in Congress with regard to matters affecting our foreign relations ceased in great measure. When Congress adjourned in December over the holiday recess the resolution, it will be remembered, of Senator Cameron, recognizing the independence of the "Republic of Cuba," had just been reported favorably by the Senate Committee on Foreign Relations, causing much uneasiness in business circles and leading to fears of a possible rupture of our friendly relations with Spain. In January the Cuban question no longer operated to disturb business, and the author of the resolution referred to did not even undertake to call it up.

Another event of an auspicious nature was the submission by President Cleveland on the 11th of a general arbitration treaty between the United States and Great Britain. The attitude of the Senate regarding the treaty was not altogether assuring. On the 30th the Committee on Foreign Relations decided to report it with some important amendments, but even then only by a vote of 6 to 4, thus showing strong opposition to the measure. The most noteworthy feature, however, in connection with the treaty was the great favor with which it was received by the public. Resolutions were adopted by mercantile associations, by religious societies and by other organized bodies in different parts of the country, urging its ratification, and in addition personal petitions in large number from prominent persons everywhere were sent to the

Senate. These appeals served not only to show that arbitration as a means for settling disputes between nations is popular, but, more than that, that our people as a whole are opposed to war and will not support efforts tending to involve the country in trouble with other nations without clear cause. It should also be noted that last Saturday (January 30th) Secretary of State Olney and Sir Julian Pauncefote signed a treaty, which was sent by the President to the Senate on Monday, for the appointment of Commissioners to determine the Alaska boundary line, thus removing another possible source of international complications.

The National Monetary Conference was also a favorable event. The Conference met at Indianapolis on the 12th and 13th and was a wholly non-partisan gathering composed of representatives of commercial organizations throughout the country. The resolutions adopted were reported unanimously by the Committee having them in charge and were agreed to by the Convention with but a few dissenting votes. The Convention declared that the gold standard must be maintained, "that steps should be taken to ensure the ultimate retirement of all classes of United States notes by a gradual and steady process," and that a banking system must be provided "which shall furnish credit facilities to every portion of the country and a safe and elastic circulation," etc. Provision was also made for an executive committee whose duty it is to be to endeavor to procure at the extra session of Congress, which it is understood will be convened in March, legislation calling for the appointment of a Monetary Commission by the President, failing which the Committee itself is to name a commission to investigate our monetary affairs.

But perhaps the most important event of the month was the authorized announcement that the portfolio of the Treasury Department in the McKinley administration had been offered to Mr. Lyman J. Gage, President of the First National Bank of Chicago, and that that gentleman had decided to accept the position. Mr. Gage is regarded as pre-eminently fitted for the place, and his appointment was at once taken as proof that the policy of the new administration concerning the currency would be satisfactory and such as to promote confidence and business revival. Among the minor incidents of the month, we may mention that Senator Wolcott, of Colorado, visited several of the European

capitals, with the concurrence, it is understood, of President-elect McKinley, to ascertain the views abroad with reference to the possibility of an international agreement for bimetallism; also that on the 29th of January the United States Senate passed a bill by a vote of 46 to 4, authorizing the President after March 4 1897 to call, in his discretion, an international conference for that purpose.

In the dry goods trade the large stocks of print cloths continued a depressing feature, though there was some slight improvement in that particular during the month. The price was 2½ cents per yard. A movement to curtail production and thus reduce stocks was proposed, but was not perfected until after the close of the month. Prices for certain makes of bleached cottons were reduced to the lowest figures on record. The price of raw cotton, however, improved a little, low middling uplands being quoted at 6 15-16 cents January 30th, against 6 11-16 cents on the 5th.

The price of the new United States 4s further advanced, they selling at 124 at the close of the month against 120½ on the 2d, and this furnishes the true index to the situation. The Treasury gold reserve kept gaining and was \$144,800,493 January 30, against \$137,316,544 December 31. In Europe money cheapened very materially, and the Bank of England reduced its minimum discount rate from 4 to 3½ per cent and the Bank of Germany lowered its rate from 5 per cent to 4 per cent.

The Delaware & Hudson reduced its dividend from 7 per cent to 5 per cent, and in Ohio the bituminous coal trade situation gave occasion for great anxiety. The Wheeling & Lake Erie and the Columbus Sandusky & Hocking passed into the hands of receivers, the latter property, however, being subsequently restored to its owners. At the close of the month an agreement had been nearly perfected among the Ohio coal roads for obtaining better rates and better prices. The House of Representatives on the 11th, by a vote of 168 to 102, rejected the bill for funding the debt of the Pacific railroads; within a few days thereafter the Government began foreclosure proceedings under its lien, after having first reached an agreement with the Reorganization Committee for a minimum bid of \$45,754,000 for its interest, including the sinking fund. The Attorney-General of Pennsylvania rendered a decision sustaining the validity of the charter of the new Reading Company; the Atchison made arrangements with the bondholders of the Atlantic & Pacific for absorbing that road; and the Chicago St. Paul Minneapolis & Omaha announced its first dividend on the common stock. President Roberts of the Pennsylvania Railroad died on January 30.

The foreign exchange market was strong most of the time, with the tendency towards higher rates. Maturing sixty-day bills held by those who had purchased them for investment were offered in considerable amounts, but the sellers in many cases made new investment purchases, at least in the early part of the month, when the interest rates abroad were still high. There was also at this time some borrowing here for London account. Later, easier money abroad removed one of the principal supports to exchange, but rates declined very little, and appearances indicated some manipulation to maintain them—presumably by those who held bills soon to mature and which would show a loss if rates fell off. The following gives the quotations for sterling exchange for every day in which a change in any class of bills occurred.

In the money market, there was a further large accumulation of currency at this centre, and rates of interest declined to very low figures. This led to an agreement among the banks not to loan below 2 per cent, but while these institutions adhered to this agreement the trust companies loaned freely at 1½ per cent. Some of the Clearing House banks also gave notice to their interior correspondents that they would allow only 1½ per cent on interior balances after the 1st of February. The following shows the interest rates on the various classes of loans for each week of the month.

*The lower rate was at trust companies; banks did not lend at less than 2 per cent.

The stock market manifested considerable strength the first half of the month; subsequently, on the developments in connection with the Ohio bituminous coal roads and the anthracite properties, prices reacted and weakness ensued. The best issues of bonds were in good demand throughout the month, and the bond market steadily improved, besides showing considerable activity.

NEW YORK STOCK EXCHANGE.

MONTHLY AND YEARLY RECORD.

The following tables furnish a complete record of the New York Stock Exchange transactions for the past month and for the year 1896. They need no extended introduction, as they are self-explanatory. The tables embrace every security (excepting only State bonds) dealt in on the Exchange. We give bonds first, using the classification adopted in the official list. As to prices the form is our own, and we think it will be found to contain just the facts desired by our readers and to present them in the most convenient way for study and reference.

For foot notes to tables see last page of Bonds and last page of Stocks.

REVIEW OF FEBRUARY.

There were some disturbing features in February, but on the whole the developments were of an encouraging nature—perhaps not so much on account of their immediate effects as because of the promise they hold out of a great improvement in the trade situation in the near future. It seems to be true also that trade is even now reviving, if only slowly. The progress in that direction has been in one sense hastened and in another sense retarded by the near approach of the 4th of March. Those who think that a change of Administration will bring a change in the business outlook have naturally been inclined to act on that belief. On the other hand, those who are not at all sure that a new Congress and a new Executive will be in themselves sufficient to work a complete cure in the situation have been disposed to wait and see what the effect would be before embarking upon new ventures. A great many persons, too, consider it prudent to defer engagements until the outcome of tariff legislation at the extra session of Congress which is to be called after the 4th of March can be determined.

The two events of greatest importance in their bearing upon the future were the collapse of the steel-rail pool and the lifting from the print-cloth market, by purchase, of a portion of the large stocks of print cloths which for so long had acted as a depressing influence upon the whole of the dry-goods trade. The disruption of the rail pool, with the break in prices which followed, was an occurrence of very great moment. During 1896 the pool price for rails was \$28 00 per ton, and this price was firmly maintained on all deliveries during that year. In December it was agreed to reduce the price to \$25 00, the reduction, however, to

apply only on deliveries during 1897. With the break in the pool, prices dropped to \$16 00@ \$18 00 a ton, and it is claimed that some sales were made at or below \$15 00. This great cheapening of prices led to the sending in of enormous orders. Railroads all over the country decided to make purchases at the prevailing low figures, and a considerable amount of business, too, was booked for export. The Bessemer rail production for 1896 was 1,102,892 tons. It is believed that within a short time after the break in the pool orders were placed to an amount approaching very closely this aggregate for the whole of last year.

The effect on the iron and steel trades was very marked. The large orders for rails ensure a large demand for steel, this in turn ensures a large demand for iron, which in turn ensures a large demand for ore, &c. Thus a great stimulus has been given to all the leading branches of the iron and steel trades, and though very little improvement in prices occurred (in some cases no improvement at all), the whole outlook was changed, and there seems every reason to believe that the event will mark a turning point in the condition of these trades. As far as the railroads are concerned the extensive purchases of rails means not only a larger amount of work in the way of repairs and renewals of track, but also, it appears likely, the construction of a fair amount of new road.

The print cloth purchase was in its way also quite important, though the immediate effects have not been so striking. The purchase consisted of 750,000 pieces, regular sizes (64x64), and was made by Mr. M. C. D. Borden, representing the American Printing Company at Fall River—500,000 pieces it is understood being spot cloth, while 250,000 pieces were for future delivery. The price of print cloths in the market just before the purchase was 2½ cents per yard; Mr. Borden is said to have paid 29-16 cents, while after the sale the price in the market advanced to 211-16 cents. But subsequently the market weakened again, and the price dropped to 2½ cents. The agreement of the mills to curtail production was carried out during the month. Notwithstanding the reaction in the print cloth market, the general tone in the dry goods trade has remained decidedly better, and business both in the primary market and with jobbers has been of larger volume.

In Europe, the uprising in Crete and the action of Greece in coming to the support of the Cretian people

proved a disturbing influence for a time, this being reflected in a sharp decline in the price of English consols. The leading European Powers acted in accord against Greece, their war ships in one instance firing upon the insurgents and other measures being taken to hold the Greeks in check. Anarchy subsequently developed, but the matter had no further disquieting effect on the European markets. Money at the leading financial centres showed growing ease. On the 4th the Bank of England reduced its rate of discount from 3½ to 3 per cent, and on the 26th the Bank of Germany reduced its rate from 4 to 3½ per cent. A plan for reforms in the administration of Cuba was signed by the Queen Regent of Spain early in the month, but in Congress the Cuban question cropped up anew on reports of cruelty to Americans imprisoned in Cuba for political offenses. On the 24th the Committee on Foreign Relations of the Senate reported a resolution by a unanimous vote demanding "the immediate and unconditional release of Julio Sanguilly," one of the imprisoned offenders. The next day some very violent speeches were made by a number of Senators, and some very radical action against Spain advocated, notwithstanding that it was known that the Spanish Government had previously decided to pardon Sanguilly and was merely awaiting the completion of some necessary formalities before granting the pardon. At the same time it was rumored that United States Consul-General Lee, at Havana, had threatened to resign his position. Attempts to secure action on the Arbitration Treaty with Great Britain failed.

The money market remained in a plethoric condition and rates ruled extremely low. The banks adhered to the agreement not to loan at less than 2 per cent on call until towards the close of the month, when one or two institutions are understood to have put out some money at a lower figure; the trust companies generally loaned at the Stock Exchange rate, which was, as a rule, 1½@1¼ per cent. The following shows the interest rates on the various classes of loans for each week of the month.

*The lower rate was at trust companies.

The foreign exchange market was very quiet and in the rates for actual business there were only three or four changes throughout the whole month. On the 1st there was a reduction of one-quarter of a cent for long and short sterling and of one-half a cent in cable transfers, but thereafter the tendency was upward, and prices closed one-half a cent higher all around than these reduced prices on the 1st. The reduction in the discount rate by the Bank of England and the low rates ruling in the open market in London wiped out all but a very small fraction of the margin of profit to be obtained in the purchase and holding of bills. Nevertheless, while considerable amounts of the previous purchases of bills for investment matured and were paid off, there were also some new investment purchases. The strength of the exchange market in

view of the large trade balance is in part explained by that fact. Another influence in the same direction was the sale by Europe of some considerable amounts of securities of the very best grades, induced by the high prices ruling here for those securities. The Northern Pacific and Oregon Railway & Navigation negotiations, alluded to below, could have had but a slight effect on exchange. The following shows the rates for actual business in sterling for every day in which a change was recorded in any class of bills.

On the Stock Exchange dealings in stocks were very limited, the sales for the entire month reaching only 2,803,401 shares. On the other hand there was a very active demand at good prices for bonds, the sales of these reaching \$38,871,240, which compares with \$37,419,600 in February 1896 and \$16,507,000 in February 1895. The trust investigation was made the basis of an attack on the industrial properties, but this was soon followed by a quick upward reaction. The anthracite coal properties were quite weak on the unfavorable condition of the coal trade, and the bituminous coal properties were also depressed, the Columbus Hocking Valley & Toledo going into the hands of a receiver. The sale of a block of Northern Pacific stock abroad and the purchase by certain interests here of the German holdings of the preferred stock of the Oregon Navigation served to strengthen the securities of these properties. Lake Shore made a sharp advance to the highest figures on record. The following furnishes a four-year comparison of the volume of business on the Stock Exchange and also shows the sales of cotton on the Cotton Exchange and of grain on the Produce Exchange.

GENERAL QUOTATIONS.

—OF— BONDS AND STOCKS.

1. In the following twenty-seven pages of tables quotations are given for all securities listed on any Stock Exchange in the United States; also for all leading unlisted and inactive securities for which we have been able to obtain reliable prices.
2. Quotations from all Stock Exchanges are as near as possible for the *last day of February*. Of course the coupon, if there be one, maturing between the date of quotation and the date of this publication, is not deducted from the price.
3. Bond prices marked thus (*) are flat prices—that is, the purchaser does not pay accrued interest in addition. Stock prices marked thus (†) are per share. All others are per cent except bank stock prices.
4. It should be borne in mind in the use of these tables that the quotations for many inactive and unlisted securities are merely nominal, but in all cases the figures are obtained from sources which are considered reliable.
5. The following abbreviations are often used, viz.; "M." for mortgage; "g." for gold; "g.d.," for guaranteed; "end.," for endorsed; "cons.," for consolidated; "conv.," for convertible; "s. f.," for sinking fund; "l. g.," for land grant.

MUNICIPAL BONDS.

It should be borne in mind that municipal bonds are not subject to such decided fluctuations in value as are securities which form a basis for speculation.

Prices marked (*) are flat prices—that is, the purchaser does not pay accrued interest in addition.

The figures in the column "to net" indicate the basis on which the securities sell or the interest rate which the securities, if held to maturity, will net to the purchaser at the present market price.

† Prices are per share not per cent.

QUOTATIONS OF BANK AND TRUST COMPANY STOCKS.

Prices are per share, not per cent, with the exception of New York City and Brooklyn bank stocks. Prices marked thus (*) are last sales.

The dagger (†) prefixed to a price indicates that the figures show the book value.

The double dagger (‡) prefixed to the capital stock indicates that only part is paid in.

The section mark (§) prefixed to surplus indicates that undivided profits are included.

REVIEW OF MARCH.

The overshadowing event of the month was the decision of the Supreme Court of the United States in the case of the Trans-Missouri Freight Association. The public mind was wholly unprepared for the ruling made, and nearly every one has been startled at a contemplation of the possible consequences to result from the application of the doctrine laid down by the Court. It had previously been accepted as an established fact that the Anti-Trust law was not meant to cover the cases of railroads, but the Supreme Court decides not only that the Act does apply to common carriers by railroad, but it rules that the words "restraint of trade" in the Act cannot be construed to have the meaning which they have had at common law, namely unreasonable restraint, but must be used in their broad, unrestricted sense—therefore barring out apparently all arrangements and agreements for the fixing of rates.

The stock market weakened as soon as the decision was declared, and the depression subsequently became quite pronounced. It was argued that the effects of the ruling were likely to be serious and far reaching; that in the present state of railroad development rates cannot be maintained except by joint action of some kind, which the Court, as it would seem, decides is forbidden. Hence the tone, previously strong for reasons presently to be mentioned, has entirely changed and prices have sharply declined. The decision has also exercised somewhat of a depressing influence on general business, owing to the knowledge that disaster to the railroads would mean serious harm to the whole range of industries. Thus we have had a repetition of previous experience that just when we were apparently on the eve of a great improvement in affairs a new dis-

turbing element has arisen, modifying or deferring the bright prospect in view.

= In the general uneasiness, the earlier event of the month, which seemed likely to have far-reaching beneficial effects, has for the moment been quite lost sight of. We refer to the arrangement by which the Lake Shore & Michigan Southern undertakes to refund in advance of maturity, and at a great saving in the yearly fixed charges, its indebtedness represented by high-rate bonds falling due within the next few years. It was at once seen that the event opened up large possibilities in the case of other roads similarly situated. The occurrence was soon followed by reports that the New York Central had a refunding scheme under consideration, and there were also rumors that other companies were discussing the advisability of action of that kind. The effect of all this was to stimulate activity in the stock market, and there was a large and general rise throughout the whole list. Then came, as said above, the decision of the Supreme Court upsetting all calculations and precipitating a decline again.

So far as the ordinary events are concerned, President McKinley was inducted into office on the 4th, and his inaugural address was favorably received. He promptly issued a proclamation convening Congress in extra session, the date of assembling being fixed for the 15th. The House of Representatives as promptly began work on the new tariff bill. The Committee on Ways and Means of the previous House had had the measure under consideration for a long time, and when the Committee of the new House entered upon its duties the bill was ready for submission. It was favorably reported to the House on the 19th, and March 31st was agreed on for taking a final vote upon it, and on that date it was passed. The probable action of the Senate on the bill is a matter of speculation. The prospect of higher tariff duties and a fear that the act might be made retroactive led to very extensive withdrawals of goods from the bonded warehouses, and on the 15th (the date when Congress convened) the payment of duties at this point reached the large figure of \$2,178,515. After that the payments rapidly fell off, anxiety regarding a possible retroactive clause having largely disappeared, but the latter part of the month the payments again became large, on the announcement that a retroactive provision had been definitely agreed upon. In the bill as it passed, April 1 was fixed as the date for the retroactive provision.

In the railroad world, another favorable occurrence (besides the Lake Shore refunding plan) was the announcement that the co-operation of Messrs. J. P. Morgan & Co. and of Drexel & Co. had been secured in readjusting the finances of the Lehigh Valley. The arrangement included a plan for refunding the indebtedness of the Paeker estate and for taking care of the Paeker promissory notes, known as Paeker paper. The scheme was important not only on its own account, but because it promised to be of benefit in preserving harmony among the anthracite coal roads. It did not, however, prevent an important break on the Stock Exchange in the price of Central of New Jersey stock. An unfavorable feature during the month was excessive rains and floods in various parts of the West and South. Along the Mississippi River an extensive area of low lands was overflowed, breaks in the levees having occurred at points in Arkansas, Missouri and Mississippi.

In the money market the only influence of consequence was the demand for loans in connection with the large withdrawals of goods from the warehouses, to get the benefit of the existing tariff rates, as mentioned above. The inquiry on that account was somewhat urgent at one time. Still there was such a plethora of funds that rates were very little changed, the effect being mainly to give a firmer tone to the market. On the Stock Exchange the rate for money on call did not at any time get above 2 per cent, and generally loans were made at 1½@1¾ per cent. On time the demand by importers advanced rates fractionally for the longer dates, but transactions were very limited. In the early part of the month the rate for ninety days to four months was 2½ per cent and for five to six months 3 per cent; later 3 per cent was asked for the former periods and 3½ per cent for the latter. In the commercial paper market much borrowing on tobacco paper was noted, the business being handled by institutions familiar with this trade, chiefly trust companies, and it was also reported that these latter had bought quite extensively of paper secured by warehouse receipts on imported goods as collateral. The following shows the interest rates on the various classes of loans for each week of the month:

The foreign exchange market, as in the preceding month, showed remarkable steadiness. In the rates for actual business there were only three or four changes throughout the whole month. It is noticeable, however, that the tendency of the market was again upward, sixty-day bills being particularly strong. In sight bills and cable transfers the net advance for the month was only one-quarter of a cent per pound sterling, but in sixty-day bills the advance was three-quarters of a cent. The rise in this latter case is ascribed to the scarcity of commercial bills and to the fact that the few bills in the market were held at high figures. It is also said that there was again a demand for investment, some bankers still figuring out a small profit in

such purchases with call money here at 1½ per cent. The following shows the rates for actual business in sterling for every day in which a change in any class of bills occurred.

In the stock market, as already said, there were two distinct movements—an upward movement and a downward movement. The outlook the early part of the month seemed brighter than for a long time past, and there was very confident buying, particularly of the Vanderbilt properties, on the refunding arrangement of the Lake Shore and the prospect of similar action in the case of other companies. Lake Shore touched 172 on the 1st; New York Central advanced to 102 on the 22d, and the granger properties, like Milwaukee & St. Paul, Chicago & North Western, St. Paul & Omaha, Burlington & Quincy, all touched their highest figures of the year between the 15th and the 18th. After the Supreme Court decision on the 22d, the market declined even more rapidly than it had previously advanced, Burlington & Quincy dropping from 78½ to 69½, Milwaukee & St. Paul common from 78½ to 71½, Rock Island from 69½ to 60½, New York Central from 102 to 93½, Chicago & North-Western from 110½ to 103½, &c., &c. From these low prices there was some slight recovery before the close of the month, the market, however, being decidedly weak again at the close on the 31st. Central of New Jersey was depressed throughout the whole month, and dropped to 77 on the 31st, against 103½ January 19th. The other anthracite properties also declined sharply on the 31st on reports of heavy losses by floods at the mines in Pennsylvania. The following furnishes a four year comparison of the volume of business on the Stock Exchange, and also shows the sales of cotton on the Cotton Exchange, and of grain on the Produce Exchange.

BOSTON STOCK EXCHANGE.

MONTHLY AND YEARLY RECORD.

The following tables furnish a record of Boston Stock Exchange transactions in railroad securities for the past month and for the year 1897. Also a record of transactions in mining stocks for the past month and for the year 1897. The railroad securities which are active on the New York Stock Exchange are omitted from this list. We give the securities in alphabetical order under the three general headings, Railroad Bonds, Railroad Stocks and Mining Stocks.

In comparing New York and Boston prices, it should be noted that bond prices in New York are flat prices—that is, the price includes the accrued interest, while in Boston accrued interest must be paid in addition to price. It should also be remembered that New York stock prices are per cent while those in Boston are dollars per share.

GENERAL QUOTATIONS.

—OF—

BONDS AND STOCKS.

1. In the following twenty-seven pages of tables quotations are given for all securities listed on any Stock Exchange in the United States; also for all leading unlisted and inactive securities for which we have been able to obtain reliable prices.
2. Quotations from all Stock Exchanges are as near as possible for the last day of March. Of course the coupon, if there be one, maturing between the date of quotation and the date of this publication, is not deducted from the price.
3. Bond prices marked thus (*) are flat prices—that is, the purchaser does not pay accrued interest in addition. Stock prices marked thus (†) are per share. All others are per cent except bank stock prices.
4. It should be borne in mind in the use of these tables that the quotations for many inactive and unlisted securities are merely nominal; but in all cases the figures are obtained from sources which are considered reliable.
5. The following abbreviations are often used, viz.; "M.," for mortgage; "g.," for gold; "g.d.," for guaranteed; "end.," for endorsed; "cons.," for consolidated; "conv.," for convertible; "s. f.," for sinking fund; "l. g.," for land grant.

QUOTATIONS OF BANK AND TRUST COMPANY STOCKS.

Prices are per share, not per cent, with the exception of New York City and Brooklyn bank stocks. Prices marked thus (*) are last sales.

The dagger (†) prefixed to a price indicates that the figures show the book value.

The double dagger (‡) prefixed to the capital stock indicates that only part is paid in.

The section mark (§) prefixed to surplus indicates that undivided profits are included.

REVIEW OF APRIL.

The two events of chief importance during April were the beginning of hostilities between Greece and Turkey and the renewal of the exports of gold after the suspension of the outflow for a good many months. The first momentarily exercised a deeply disturbing influence on the various markets; the latter was viewed with comparative equanimity.

It was on Saturday the 17th that the Turkish Government proclaimed that a "state of war" existed on the Grecian frontier, and that this warranted an advance of the Turkish armies to repel the Greeks. The announcement reached the public through the morning papers on Sunday, and almost simultaneously came the news that fighting had already begun between the armies of the two nations. The next day (Monday) was a holiday at the various financial centres of Europe, but the effect on the markets here was significant and pronounced. Stocks declined several points, and wheat jumped up a number of points. The following day when business was resumed at the European centres, it was seen that the foreign markets took a much less unfavorable view of the situation than our own markets had taken, and that no fears were entertained of a general European war. Accordingly the stock market sharply reacted, while on the other hand the wheat market lost a portion of its previous advance. The remainder of the month the Græco-Turkish war had comparatively little effect on the markets. The early engagements showed a great many successes for the Greeks, but later the Greeks met with reverses nearly everywhere, apparently because of bad leadership, and about a week after the starting of the contest they made a general retreat,

and their armies became utterly demoralized, so that it seemed unlikely that the struggle could be continued. A change of ministry was forced, and it was even reported that the royal family was in danger.

A sharp speculation in wheat was one of the incidents of the war. Before the outbreak of hostilities the price of wheat had sharply declined and the market was decidedly weak—a condition that it was hard to account for in view of the statistical position and the general surroundings bearing on values. The war completely changed the course and aspect of the market, and though the whole of the advance in price was not retained the tone remained good, and the market did not again relapse into the state of weakness which existed prior to the war. On the 1st of April the July option sold on the Produce Exchange at 75½ cents, against 80½ cents on March 2; on the 9th of April the price had declined to 70¾ cents; then a slow recovery began, on the advices from the Greek frontier indicating the possibility of war, and on the 15th the price had got back to 75¾ cents. On the 17th 77½ cents was touched and on the 19th there was an advance to 83½ cents. On the 20th the price dropped back to 78 cents, and thereafter it continued to fluctuate widely, reaching 82¼ cents on the 24th and dropping to 75½ on the 29th; the close on the 30th was at 77¾ cents. The dealings in grain futures of all kinds on the Exchange reached 228,317,070 bushels, against only 108,317,975 bushels in April last year.

As regards the gold exports, the outflow was the first since last July. While unwelcome, it was not regarded as of a nature to give any cause for uneasiness, the position of the Treasury in the matter of its gold reserve being very strong, and other circumstances also being such as to make the outflow of comparatively little moment. The exports of the metal arose mainly out of the increase in the merchandise imports in anticipation of the enactment of the new tariff law providing for higher Customs duties; at the same time there was an urgent demand for the metal from Japan and Austria, thus forcing the shipments, the Austrian Government having sold a large amount of Treasury bills in London and Vienna and requiring payment in gold. The first engagement of the metal was announced on the 24th. Doubtless in view of the virtual premium for the metal offered abroad some engagements would have occurred before this except that an agreement existed among the leading

bankers not to ship gold unless sight bills for sterling could be sold at 4 88½. The price for bills was half a cent below this figure when Muller, Schall & Co. engaged \$977,000 on the 24th for shipment to Austria on the 27th, but they claimed that they could not refuse to send gold on a direct order. After this first engagement considerable further amounts were taken. The actual sum exported to Europe within the month was only \$2,477,000, but \$4,000,000 more had been taken on the 30th for shipment on Saturday May 1, and there were also engagements of other amounts for shipment on the 4th of May. The Treasury gold reserve stood at \$151,786,-464 April 1 and at \$153,340,890 May 1.

Very slow progress was made with the tariff bill in the Senate. When received from the House on April 1 it was referred to the Finance Committee, who referred it to a sub-committee, and the bill remained in charge of this sub-committee throughout the whole month and until the 4th of May, on which day it was first reported to the full committee, and then to the Senate. No vote was reached in the Senate during April on the Arbitration Treaty with Great Britain.

A more hopeful view was taken regarding the immediate effects of the Supreme Court decision in the Trans-Missouri Freight cases. Special efforts were made by the railroad people to prevent demoralization in rates, and the various traffic associations, instead of being entirely disbanded, were reorganized as bureaus of statistics or modified in other ways and continued in existence. The United States Supreme Court on the 5th granted the motion to advance the suit against the Joint Traffic Association, but fixed the date for the hearing for October instead of in April, as requested. At a meeting of the Board of Control of the Association on the 13th it was formally voted to maintain the work of the Association pending the determination of the appeal by the Supreme Court. A petition was also filed on the 19th with the Supreme Court for a re-hearing in the Trans-Missouri Freight case.

The flood situation in the Mississippi Valley grew steadily worse, being, according to some accounts, the worst in the country's history. President McKinley sent a special message to Congress early in the month urging measures of relief for the afflicted sections, and Congress voted an appropriation of \$200,000. According to a report issued by the Agricultural Department the area of submerged land on April 21 comprised over 20,000 square miles, extending through Missouri, Arkansas, Tennessee, Mississippi and Louisiana.

An important occurrence during the month was the announcement of a scheme for refunding the debt of the New York Central, similar to the arrangement carried out in the Lake Shore case, the new bonds to bear only 3½ per cent interest. The plan also provides for the refunding, separately, of \$12,000,000 of New York & Harlem 7s into new 3½ per cents.

The foreign exchange market developed growing strength, even before the outbreak of hostilities between Greece and Turkey. That event was followed on Monday the 19th by a further rise of half a cent per pound sterling in sixty day bills and three-quarters of a cent in sight and cable transfers. At this time no engagements of gold for export had yet been made and rates for actual business in sixty-day bills were 4 86½@4 87 and in sight bills 4 88½@4 88½. On Tuesday the 20th, under the reaction which followed after the excitement of the day before, rates

declined one-quarter of a cent per pound, so that when gold was engaged on the 24th for shipment to Europe, the rate for sight bills was 4 88@4 88½. The sale of bills against these and subsequent engagements led to further declines. The following shows the rates for actual business in sterling for every day in which a change in any class of bills occurred.

In the stock market, in addition to the Græco-Turkish war, the serious floods in the Mississippi Valley were a depressing influence. The New York Central refunding scheme kept Central stock strong but had little influence on the general market. The gold exports likewise had little influence on prices. Notwithstanding the sharp fluctuations in the market, the share sales for April reached only 3,569,007 shares.

REVIEW OF MAY.

While few evidences of an improvement in business have been discernible in May, favorable developments promising a better state of things in the future have not been altogether wanting. The spring has been cool and backwards in nearly all parts of the country but yet the usual progress has been made in farm work in the West, and the planting of the leading crops has been completed under quite satisfactory conditions. In the South a distinct change for the better occurred in the situation of the overflowed districts in the Mississippi Valley. The water has been steadily receding and in many of the districts cotton planting has been begun on the lands recently submerged.

The course of tariff legislation has also been much more encouraging—that is, the work has proceeded more expeditiously than had been expected at one time. The sub-committee of the Senate Finance Committee, which has had the new bill in charge, made its report to the full committee on Tuesday, May 4th, and the latter instead of following the usual course and keeping the measure under consideration for a time reported the bill the same day to the Senate. Moreover, to the relief of business interests it was found that the retroactive clause had been stricken from the bill. The Finance Committee in submitting the bill gave notice that it would be called up on the 18th, but this was subsequently changed to the 24th. On the 25th general debate on the bill was begun, and consideration of the various sections proceeded with reasonable diligence, there being no indication of factious opposition by the opponents of the measure.

The outflow of gold from the United States to Europe continued, but did not reach very large pro-

portions. It created no feeling of uneasiness or alarm and in fact caused scarcely a ripple on the surface of affairs. One reason for this was that it was generally felt that the Treasury and the country are exceptionally well able to meet the drain at this time, and then also it became palpably evident that the exports of the metal were the result entirely of special circumstances, chiefly the large merchandise imports arising out of the desire on the part of merchants to get their goods through the customs houses before the new tariff bill imposing higher rates of duties shall go into effect. The Government trade statement showed merchandise imports of \$101,305,000 for April, by far the largest total for any month in the country's history. In April 1896 the imports were only \$58,650,000, and previously the largest monthly aggregate was that for March 1893, namely \$86,663,524. The Treasury gold balance amounted to \$153,340,890 May 1 and to \$144,319,563 June 1.

The Arbitration Treaty with Great Britain, as amended in the Senate, finally came to a vote on the 5th, and failed of ratification, not having received the two-thirds vote necessary for that purpose. The vote stood 43 against 26. Cuban matters again came to the front, and at one time proved quite a disturbing feature. Rumors were current that the new Administration would assume an aggressive attitude in the conflict in progress on that island. One or two Senators who had had access to the correspondence on file in the State Department furnished a rather sensational account of the state of things prevailing on the island. In the resulting discussions the usual violent speeches were made. On the 17th the President sent a message to Congress, but it related simply to the condition of needy Americans in Cuba and suggested an appropriation of \$50,000 for their relief. The appropriation was promptly voted. On the 20th the Senate passed a resolution by a vote of 41 to 14 recognizing the belligerency of the Cuban insurgents. It is not considered likely that the resolution will be allowed to come up in the House for some time.

The Turco-Grecian war ceased to have any influence on the markets either here or abroad. The Greeks were completely vanquished, and the great European Powers intervened to protect them from the rapacity of the Turks, who sought to impose very onerous conditions, such as the cession of Thessaly to Turkey, the payment by Greece of an indemnity of £10,000,000, the

abandonment of Greek capitulations, &c. An armistice was agreed on during the month and renewed again at the close. Previously the Greeks had withdrawn their forces from the island of Crete, out of the occupation of which the whole trouble between the two countries had arisen.

The price of print cloths at Fall River dropped to 2 7-16 cents per yard, which is as low as any figure previously recorded. A curtailment resolution was adopted by some of the Southern manufacturers of cotton at a meeting in Charlotte on the 15th, but as the gathering was composed almost entirely of representatives of yarn mills, the action taken was not regarded as conclusive. A local event of some importance, acting to depress the woolen goods trade, was the strike of the garment makers in the tailoring trades in New York City and vicinity.

In the railroad world, the Illinois Central announced the negotiation of large issues of 3½ per cent bonds, to finance operations connected with the acquisition of the Chesapeake Ohio & Southwestern and Alton & Terre Haute roads. An important event indicative of the prostration of the railway industry was the reduction of the dividend of the Chicago & Alton, which had been maintained on an 8 per cent basis for years, to 7 per cent. Not less important in its general bearing was the decision of the United States Supreme Court in the action against the Cincinnati New Orleans & Texas Pacific and other Southern roads, denying the right of the Inter-State Commerce Commission to fix or prescribe rates. In this State an action begun by the Attorney-General at Albany against the anthracite coal roads, under the recently passed anti-trust laws, attracted a good deal of attention. At Washington, Mr. Elverton R. Chapman, who had refused to answer questions before the Senate Investigating Committee in the Sugar investigation of 1894, was forced, after many appeals, to serve a term in prison. On the other hand, both Mr. Henry O. Havemeyer and John E. Searles, who had been indicted for the same offense, were brought to trial and by order of the Judge, acquitted. The long period of depression in trade led to the liquidation of the Third National Bank of this city, and the transfer of its business and accounts to the National City Bank. A movement looking towards the consolidation of banks in other parts of the country is also to be noted. At Albany Governor Black vetoed the Dudley Graduated Inheritance Tax Bill.

The foreign exchange market was devoid of important features. While rates fluctuated more or less, the general tendency was downwards, and in actual business the price for bankers' sixty day bills was half a cent lower, and for sight bills and cable transfers three quarters of a cent lower at the close than at the beginning of the month. Gold exports continued, but were not of exceptionally large volume, and those at the close of the month were facilitated by triangular operations based upon the condition of sterling at Paris on London. After the shipment of \$4,000,000 gold May 1 (on engagements made the day previous) the exports to Europe from this port for the week ending the 8th were \$2,500,000, the week ending the 15th \$2,800,000, the week ending the 22d \$1,200,000 and the week ending the 29th \$2,850,000. In each case the sale of bills against these exports sensibly weakened the market. There also appears to have been a fair supply of bills against shipments of provisions and flour. On the

other hand the demand for remittance for imported goods was not so urgent as it previously had been, the reason presumably being that part of the goods have not been sold yet and will not be remitted for until they arc. The Bank of England on the 13th reduced its minimum rate of discount from 2½ per cent to 2 per cent. Changes in actual rates have been :

Speculation on the Stock Exchange continued dull and the volume of business has been small, the share sales reaching only about 3½ million shares. The movements of prices were decidedly irregular, some stocks manifesting firmness, others weakness. Nor has the tone been at all uniform, periods of depression alternating with periods of strength, the close being quite confident.

BOSTON STOCK EXCHANGE.

MONTHLY AND YEARLY RECORD.

The following tables furnish a record of Boston Stock Exchange transactions in railroad securities for the past month and for the year 1897. Also a record of transactions in mining stocks for the past month and for the year 1897. The railroad securities which are active on the New York Stock Exchange are omitted from this list. We give the securities in alphabetical order under the three general headings, Railroad Bonds, Railroad Stocks and Mining Stocks.

In comparing New York and Boston prices, it should be noted that bond prices in New York are flat prices—that is, the price includes the accrued interest, while in Boston accrued interest must be paid in addition to price. It should also be remembered that New York stock prices are per cent while those in Boston are dollars per share.

GENERAL QUOTATIONS

—OF—

BONDS AND STOCKS.

1. In the following twenty-seven pages of tables quotations are given for all securities listed on any Stock Exchange in the United States; also for all leading unlisted and inactive securities for which we have been able to obtain reliable prices.
2. Quotations from all Stock Exchanges are as near as possible for the *last day of May*. Of course the coupon, if there be one, maturing between the date of quotation and the date of this publication, is not deducted from the price.
3. Bond prices marked thus (*) are flat prices—that is, the purchaser does not pay accrued interest in addition. Stock prices marked thus (†) are per share. All others are per cent except bank stock prices.
4. It should be borne in mind in the use of these tables that the quotations for many inactive and unlisted securities are merely nominal, but in all cases the figures are obtained from sources which are considered reliable.
5. The following abbreviations are often used, viz.; "M.," for mortgage; "g.," for gold; "g'd.," for guaranteed; "end.," for endorsed; "cons.," for consolidated; "conv.," for convertible; "s. f.," for sinking fund; "l. g.," for land grant.

Prices marked thus (*) are flat prices—that is, the purchaser does not pay accrued interest in addition.

Table with 4 columns: Bonds, Bid, Ask. It lists various street railway bonds from cities like Albany, Baltimore, Boston, and Chicago, including titles like 'ALBANY, N. Y.—' and 'BALTIMORE, MD.—'.

Flat prices. § Reorganizing.

Table of stock quotations with columns for Stock, Par, Bid, Ask, and various stock names like Montreal, Nashville, Newark, etc.

† Prices per share not per cent. x Ex-dividend. ‡ Last sale.

MUNICIPAL BONDS.

It should be borne in mind that municipal bonds are not subject to such decided fluctuations in value as are securities which form a basis for speculation.

Prices marked (*) are flat prices—that is, the purchaser does not pay accrued interest in addition.

The figures in the column "to net" indicate the basis on which the securities sell or the interest rate which the securities, if held to maturity, will net to the purchaser at the present market price.

Table of municipal bond quotations with columns for Bonds, Bid, Ask, To Net, and various bond names like Alabama, Canada, Colorado, etc.

† Prices are per share not per cent.

QUOTATIONS OF BANK AND TRUST COMPANY STOCKS.

Prices are per share, not per cent, with the exception of New York City and Brooklyn bank stocks. Prices marked thus (*) are last sales.

The dagger (†) prefixed to a price indicates that the figures show the book value.

The double dagger (‡) prefixed to the capital stock indicates that only part is paid in.

The section mark (§) prefixed to surplus indicates that undivided profits are included.
